The Architecture of Death, 1984 **Architecture of death; the transformation of the cemetery in eighteenth-century Paris** R. Etlin, 1987 The Architecture of Death Richard E. Etlin, 1948 **The Making of Revolutionary Paris** David Garrioch, 2004-08-16 An unusually compelling work of scholarly synthesis a history of a city of revolution in a revolutionary century Garrioch claims that until 1750 Paris remained a city characterized by a powerful sense of hierarchy From the mid century on however and with gathering speed economic demographic political and social change swept the city Having produced an extremely engaging account of the old corporate society Garrioch turns to the forces that relentlessly undermined it John E Talbott author of *The Pen and Ink Sailor* Charles Middleton and the King's Navy 1778 1813 A truly wonderful synthesis of the many historical strands that compose the history of eighteenth century Paris In rewriting the history of the French Revolution as a more than century long urban metamorphosis Garrioch makes a brilliant case for the centrality of Paris in the history of France Bonnie Smith author of *The Gender of History Men Women and Historical Practice* Architecture, Death and Nationhood Hannah Malone, 2017-04-28 In the nineteenth century new cemeteries were built in many Italian cities that were unique in scale and grandeur and which became destinations on the Grand Tour From the Middle Ages the dead had been buried in churches and urban graveyards but in the 1740s a radical reform across Europe prohibited burial inside cities and led to the creation of suburban burial grounds Italy's nineteenth century cemeteries were distinctive as monumental or architectural structures rather than landscaped gardens They represented a new building type that emerged in response to momentous changes in Italian politics tied to the fight for independence and the creation of the nation state As the first survey of Italy's monumental cemeteries the book explores the relationship between architecture and politics or how architecture is formed by political forces As cities of the dead cemeteries mirrored the spaces of the living Against the backdrop of Italy's unification they conveyed the power of the new nation efforts to construct an Italian identity and conflicts between Church and state Monumental cemeteries helped to foster the narratives and mentalities that shaped Italy as a new nation **Fleeting Moments** Gunther Barth, 1990-10-18 The tension between nature and culture which accompanies the rise of any large society has become a subject of great concern in our time In this compelling study Gunther Barth acclaimed author of *City People The Rise of Modern City Culture in Nineteenth Century America* identifies fleeting moments of concord between nature and culture in the course of American history During the search for the Wilderness Passage the progress of the Lewis and Clark expedition and the building of park cemeteries and big city parks Americans realized that nature was not merely a force to be reckoned with not merely a resource to be exploited but also an integral component of their lives Through the engineering of nature and culture in the urban environment the energetic attempts to conserve large scale nature in the United States emerged as an offspring of the big city Heightening our understanding of the historical complexity of the relationship between nature and culture and suggesting that harmony between the two is a

mark of civilization this original study will be an invaluable guide to anyone concerned with the quality of life in America past and future

Julien-David Leroy and the Making of Architectural History Christopher Drew Armstrong, 2013-04-15 This book examines the career and publications of the French architect Julien David Leroy 1724 1803 and his impact on architectural theory and pedagogy Despite not leaving any built work Leroy is a major international figure of eighteenth century architectural theory and culture Considering the place that Leroy occupied in various intellectual circles of the Enlightenment and Revolutionary period this book examines the sources for his ideas about architectural history and theory

and defines his impact on subsequent architectural thought This book will be of key interest to graduate students and scholars of Enlightenment era architectural history

Deathscapes James D. Sidaway, 2016-05-13 Death is at once a universal and everyday but also an extraordinary experience in the lives of those affected Death and bereavement are thereby intensified at and frequently contained within certain sites and regulated spaces such as the hospital the cemetery and the mortuary However death also affects and unfolds in many other spaces the home public spaces and places of worship sites of accident tragedy and violence Such spaces or Deathscapes are intensely private and personal places while often simultaneously being shared collective sites of experience and remembrance each place mediated through the intersections of emotion body belief culture society and the state Bringing together geographers sociologists anthropologists cultural studies academics and historians among others this book focuses on the relationships between space place and death bereavement in western societies Addressing three broad themes the place of death the place of final disposition and spaces of remembrance and representation the chapters reflect a variety of scales ranging from the mapping of bereavement on the individual or in private domestic space through to sites of accident battle burial cremation and remembrance in public space The book also examines social and cultural changes in death and bereavement practices including personalisation and secularisation Other social trends are addressed by chapters on green and garden burial negotiating emotion in public private space remembrance of violence and disaster and virtual space A meshing of material and more than representational approaches consider the nature culture economy and politics of Deathscapes what are in effect some of the most significant places in human society

The Pantheon , The Urban Uncanny Lucy Huskinson, 2016-04-28 The Urban Uncanny explores through ten engaging essays the slippage or mismatch between our expectations of the city as the organised and familiar environments in which citizens live work and go about their lives and the often surprising and unsettling experiences it evokes The city is uncanny when it reveals itself in new and unexpected light when its streets buildings and people suddenly appear strange out of place and not quite right Bringing together a variety of approaches including psychoanalysis historical and contemporary case study of cities urban geography film and literary critique the essays explore some of the unsettling mismatches between city and citizen in order to make sense of each and to gauge the wellbeing of city life more generally Essays examine a number of cities including Edmonton London Paris Oxford Las Vegas Berlin and New York and address a range of issues including those of memory death anxiety alienation and identity Delving into the complex repercussions of contemporary mass urban development The Urban Uncanny opens up the pathological side of cities both real and imaginary This interdisciplinary collection provides unparalleled insights into the urban uncanny that will be of interest to academics and students of urban studies urban geography psychoanalysis cultural studies social studies and film studies and to anyone interested in the darker side of city life

Making and Remaking Pennsylvania's Civil War William Blair, William Pencak, 2010-11-01

Death and Burial in Socialist Yugoslavia Carol S. Lilly, 2024-02-08 Across

the globe memorial and grave sites are being increasingly weaponized in conflicts and politicized by parties to advance agendas Here Carol S Lilly examines ideas of death politics memory ideology and nationalism in the former Yugoslav republics of Bosnia Hercegovina Croatia and Serbia to shine fresh light on cemetery culture in 20th century Europe More specifically Death and Burial in Socialist Yugoslavia argues that while the CPY created its own communities of the dead in postwar Partisan Cemeteries it failed to do the same for civilian cemeteries in ways that might reinforce its ideals of secularism pluralism and brotherhood and unity Moreover the communist regime left the previous system of ethno religious segregation in place further isolating Catholics Orthodox Muslims and Jews who continued to be buried in separate locations Finally it explicitly politicized burial rites and grave markers making cemeteries into legitimate spaces of political discourse As a result by the time Yugoslavia disintegrated in the early 1990s dead bodies and cemeteries had become a concerted weapon of war in the ongoing ethnic conflict Ultimately then this timely study reveals for the first time the extent to which the communist regime not only failed to created their own communities of the dead but also further divided and alienated living communities in Yugoslavia

The Mourner's Dance Katherine Ashenburg,2004-09-01 When her daughter s fianc died suddenly Katherine Ashenburg was surprised to see how her daughter intuitively re created the traditional rituals of mourning even those of which she was ignorant Intrigued Ashenburg began to explore the rich and endlessly inventive choreographies different cultures and times have devised to mark a universal and deeply felt plight Contemporary North American culture favors a mourning that is private and virtually invisible But as Ashenburg reveals the grieving customs of the past were so integrated into daily life that ultimately they gave rise to public parks and ready to wear clothing Our keepsakes prescribed bereavement garb resting places mourning etiquette and ways of commiserating from wakes to Internet support groups remain clues to our most elemental beliefs and our most effective means of restoring selves and communities unraveled by loss

The Cemeteries of New Orleans Peter B. Dedek,2017-06-12 In The Cemeteries of New Orleans Peter B Dedek reveals the origins and evolution of the Crescent City s world famous necropolises exploring both their distinctive architecture and their cultural impact Spanning centuries this fascinating body of research takes readers from muddy fields of crude burial markers to extravagantly designed cities of the dead illuminating a vital and vulnerable piece of New Orleans s identity Where many histories of New Orleans cemeteries have revolved around the famous people buried within them Dedek focuses on the marble cutters burial society members journalists and tourists who shaped these graveyards into internationally recognizable emblems of the city In addition to these cultural actors Dedek s exploration of cemetery architecture reveals the impact of ancient and medieval grave traditions and styles the city s geography and the arrival of trained European tomb designers such as the French architect J N B de Pouilly in 1833 and Italian artist and architect Pietro Gualdi in 1851 As Dedek shows the nineteenth century was a particularly critical era in the city s cemetery design Notably the cemeteries embodied traditional French and Spanish precedents until the first garden cemetery the

Metairie Cemetery was built on the site of an old racetrack in 1872. Like the older walled cemeteries, this iconic venue served as a lavish expression of fraternal and ethnic unity, a backdrop to exuberant social celebrations, and a destination for sightseeing excursions. During this time, cultural and religious practices such as the celebration of All Saints Day and the practice of Voodoo rituals flourished within the spatial bounds of these resting places. Over the course of the twentieth and twenty-first centuries, however, episodes of neglect and destruction gave rise to groups that aimed to preserve the historic cemeteries of New Orleans, an endeavor which, according to Dedek, is still wanting for resources and political will. Containing ample primary source material, abundant illustrations, and appendices on both tomb styles and the history of each of the city's eighteenth and nineteenth-century cemeteries, *The Cemeteries of New Orleans* offers a comprehensive and intriguing resource on these fascinating historic sites.

The English Poetic Epitaph Joshua Scodel, 1991. Readers interested in English literary history, cultural poetics, comparative literature, the history of attitudes toward death, and the relationship between literature and the visual arts will find *The English Poetic Epitaph* a fascinating reading.

The Rise and Fall of Modern Empires, Volume I Owen White, 2017-03-02. This collection brings together twenty-one articles that explore the diverse impact of modern empires on societies around the world since 1800. Colonial expansion changed the lives of colonised peoples in multiple ways relating to work, the environment, law, health, and religion. Yet empire builders were never working with a blank slate; colonial rule involved not just coercion but also forms of cooperation with elements of local society, while the schemes of the colonisers often led to unexpected outcomes. Covering not only western European nations but also the Ottomans, Russians, and Japanese, whose empires are less frequently addressed in collections, this volume provides insight into a crucial aspect of modern world history.

Spatial Recall Marc Treib, 2013-09-13. Architecture and designed landscapes serve as grand mnemonic devices that record and transmit vital aspects of culture and history. *Spatial Recall* casts a broad net over the concept of memory and gives a variety of perspectives from twelve internationally noted scholars, practicing designers, and artists such as Juhani Pallasmaa, Adriaan Geuze, Susan Schwartzberg, Georges Descombes, and Esther da Costa Meyer. Essays range from broad topics of message and audience to specific ones of landscape production. Beautifully illustrated, *Spatial Recall* is a comprehensive view of memory in the built environment: how we have read it in the past and how we can create it in the future. Please note: this book is now printed digitally.

The Vital Landscape William M. Taylor, 2017-11-22. *The Vital Landscape* explores the arrival of the biological sciences, most notably the sciences of life, entailed in studies of botany and zoology, ecology, and evolutionary science, physiology, and psychology in the nineteenth century and their impact on architecture and landscape architecture in Great Britain. Specifically, the book explores the idea of the contrived or artificial environment as an object of both scientific speculation and aesthetic reflection. Unlike specialist histories of biological science or environmental thought, this book is unique in locating one source for present-day concerns for the environment and human well-being in debates over proper housing and the growing popularity of domestic and public

gardens in the nineteenth century The book skilfully interweaves architecture and garden history the history and philosophy of science plant and animal physiology and human psychology works of literature popular science and domestic economy in a story that opens new opportunities for the study of architecture and gardens
