**The Art and Science of Inventing** Gilbert Kivenson,2012-12-06 The Independent Inventor Most persons have at some time in their lives invented somethin perhaps a gadget for making some task easier or a method for increas ing the economy of an everyday operation Aside from a certain degree of personal satisfaction the great majority of these inven tions have never yielded their creators any amount of real return In many instances the fault has been with the inventor himself who made little or no effort beyond writing down the bright idea In a significant number of cases however the problem has arisen from a general lack of

knowledge of what to do about a promising idea The individual who works full time in a non technical job usually has no guidance for proceeding in a logical professional way towards effective development and utilization of his invention Several other factors are responsible for the considerable waste we see in the handling of inventions Perhaps the most significant of these factors is an incomplete awareness of prior art A stenographer dreams up a device to facilitate the distribution of incoming mail She feels that the idea is so simple that others must have patented it long ago and so she goes no further with the concept At the other extreme is the garage mechanic who invents a new type of wrench **Cosmopolitan** ,1914
