The Evolution of Taste in American Collecting is a new critical translation of Ren Brimo's classic study of eighteenth and nineteenth century patronage and art collecting in the United States Originally published in French in 1938 Brimo's foundational text is a detailed examination of collecting in America from colonial times to the end of World War I when American collectors came to dominate the European art market This work helped shape the then fledgling field of American art history by explaining larger cultural transformations as manifested in the collecting habits of American elites It remains the most substantive account of the history of collecting in the United States In his introduction Kenneth Haltman provides a biographical study of the author and his social and intellectual milieu in France and the United States He also explores how Brimo's work formed a turning point and initiated a new area of academic study the history of art collecting Making accessible a text that has until now only been available in French Haltman's elegant translation of The Evolution of Taste in American Collecting sheds new critical light on the essential work of this extraordinary but overlooked scholar

**Artful Acquisitions** Henry Jeffs, The journey of art collecting begins not with the first purchase but with the first moment of genuine connection between viewer and artwork This profound experience often described as a spark of recognition or an inexplicable pull toward a particular piece forms the foundation upon which all meaningful collections are built Understanding and nurturing this initial passion while developing a clear sense of purpose becomes the compass that guides collectors through the complex and often overwhelming world of art acquisition The motivations for collecting art are as diverse as the collectors themselves ranging from pure aesthetic appreciation to investment considerations from social status to historical preservation Some collectors are drawn by the intellectual challenge of understanding artistic movements and cultural contexts while others are motivated by the emotional satisfaction of living with beautiful objects that speak to their souls The most successful collectors however are those who combine genuine passion with thoughtful purpose creating collections that reflect both their personal aesthetic sensibilities and their broader cultural or intellectual interests Developing a collecting philosophy requires honest self reflection about what moves you artistically and why This process involves examining your responses to different types of art identifying patterns in your preferences and understanding the underlying values that drive your aesthetic choices Do you gravitate toward works that challenge conventional thinking or do you prefer pieces that offer comfort and beauty Are you

drawn to emerging artists whose careers you can follow and support or do you prefer the established quality and proven significance of historical works These fundamental questions help establish the philosophical framework that will inform your collecting decisions for years to come
