The ecological transition John William Bennett, **The Ecological Transition** John William Bennett, 1976-01-01

The Ecological Transition John W. Bennett, 2017 Written during the height of the ecology movement *The Ecological Transition* is a stunning interdisciplinary work It combines anthropology ecology and sociology to formulate an understanding of cultural environmental relationships While anthropologists have been studying relationships between humans and the physical environment for a very long time only in the last thirty years have questions inherent in these relationships broadened beyond description and classification For example the concept of environment has been extended beyond the physical into the social Although anthropologists have adopted many of the concepts that Bennett develops in the book he also feels that the central issues have never been addressed either by anthropologists or by people in related disciplines The most important of these in Bennett's opinion is the failure to incorporate a respect for the environmental in contemporary culture which would allow making exceptions in certain human practices in order to protect the environment His point in *The Ecological Transition* is that a basic cultural change in modern civilization is necessary to achieve this end Both a theoretical and a practical work *The Ecological Transition* emphasizes the relationships between human culture the physical environment technology and social policy *The Ecological Transition* is a challenging volume that makes us face the consequences of human behavior in the modern world its effect on pollution natural resources agriculture the economy and population to name just a few areas The book remains a significant contribution to the discourse on social economic and environmental problems While the book was first published in 1976 it still reads as a contemporary tract Provided by publisher

Literature as Cultural Ecology Hubert Zapf, 2016-04-21 This book is available as open access through the Bloomsbury Open Access programme and is available on www.bloomsburycollections.com Drawing on the latest debates in ecocritical theory and sustainability studies Literature as Cultural Ecology Sustainable Texts outlines a new approach to the reading of literary texts Hubert Zapf considers the ways in which literature operates as a form of cultural ecology using language imagination and critique to challenge and transform cultural narratives of humanity's relationship to nature In this way the book demonstrates the important role that literature plays in creating a more sustainable way of life Applying this approach to works by writers such as Emily Dickinson Edgar Allan Poe Herman Melville William Faulkner Toni Morrison Zakes Mda and Amitav Ghosh Literature as Cultural Ecology is an essential contribution to the contemporary environmental humanities

Since the Time of the Transformers Alan D. McMillan, 2000-02-01 This book examines over 4000 years of culture history of the related Nuuchah-nulth Ditidaht and Makah peoples on western Vancouver Island and the Olympic Peninsula Using data from the Toquaht Archaeological Project McMillan challenges current ethnographic interpretations that show little or no change in these peoples' culture Instead by combining historical evidence recent archaeological data and oral traditions he demonstrates conclusively that there were in fact extensive cultural changes and restructuring in these societies in the century following contact with Europeans McMillan brings the reader up to modern times identifying the major issues that face the Nuuchah-nulth Ditidaht and Makah communities today
