The Economics Of International Investment:

Foreign Direct Investment and Human Development Olivier De Schutter, Johan Swinnen, Jan Wouters, 2012-11-27

This book presents original research that examines the growth of international investment agreements as a means to attract foreign direct investment FDI and considers how this affects the ability of capital importing countries to pursue their development goals The hope of countries signing such treaties is that foreign capital will accelerate transfers of technologies create employment and benefit the local economy through various types of linkages But do international investment agreements in fact succeed in attracting foreign direct investment And if so are the sovereignty costs involved worth paying In particular are these costs such that they risk undermining the very purpose of attracting investors which is to promote human development in the host country This book uses both economic and legal analysis to answer these questions that have become central to discussions on the impact of economic globalization on human rights and human development It explains the dangers of developing countries being tempted to signal their willingness to attract investors by providing far reaching protections to investors rights that would annul or at least seriously diminish the benefits they have a right to expect from the arrival of FDI It examines a variety of tools that could be used by capital exporting countries and by capital importing countries alike to ensure that FDI works for development and that international investment agreements contribute to that end This uniquely interdisciplinary study located at the intersection of development economics international investment law and international human rights is written in an accessible language and should attract the attention of anyone who cares about the role of private investment in supporting the efforts of poor countries to climb up the development ladder

Viñuales,2014-05-01 International investment law is one of the fastest growing areas of international law It has led to the signing of thousands of agreements mostly in the form of investment contracts and bilateral investment treaties Also in the last two decades there has been an exponential growth in the number of disputes being resolved by investment arbitration tribunals Yet the legal principles at the basis of international investment law and arbitration remain in a state of flux Perhaps the best illustration of this phenomenon is the wide disagreement among investment tribunals on some of the core concepts underpinning the regime such as investment property regulatory powers scope of jurisdiction applicable law or the interactions with other areas of international law The purpose of this book is to revisit these conceptual foundations in order to shed light on the practice of international investment law It is an attempt to bridge the growing gap between the theory and the practice of this thriving area of international law The first part of the book focuses on the infrastructure of the investment regime or more specifically on the structural arrangements that have been developed to manage foreign investment transactions and the potential disputes arising from them The second part of the book identifies the common conceptual bases of an array of seemingly unconnected practical problems in order to clarify the main stakes and offer balanced solutions The third part addresses the main sources of regime stress as well as the main legal mechanisms available to manage such challenges to the operation of the regime Overall the book offers a thorough investigation of the conflicting theoretical positions underlying international investment law testing their worth by reference to concrete issues that have arisen in the jurisprudence It demonstrates that many of the most important practical questions arising in practice can be addressed by a carefully dosed resort to theory
