The Emergence Of The Past A Theory Of Historical Explanation:

The Emergence of the Past Dale H. Porter, Logic of Historical Explanation Clayton Roberts, 2010-11-01 *The Historiography of Economics* A.W. Bob Coats, 2013-10-08 This is the third and final volume of collected papers of A W Bob Coats Coats began to collect material for this volume in the years following the publication of the second volume in 1993 but sadly died in 2007 before the work was completed The volume has now been completed under the editorship of Roger Backhouse and Bruce Caldwell Along with his articles the compilation of the volume also reflects Coats interest in and commitment to book reviews a selection of which have been chosen for inclusion The book also includes a comprehensive bibliography In addition to a preface by Backhouse and Caldwell the volume also reproduces the obituary that was published in *History of Political Economy* a memoir published in 1996 and an interview with Grant Fleming published the previous year Together the introductory materials articles and reviews serve as a fitting tribute to the body of work of Bob Coats **The Truth of History** C. Behan McCullagh, 2002-11 Modern relativism and postmodern thought in culture and language challenge the truth of history This book considers how historians confined by argument of their own cultures can still discover truths about the past **History and Precedent in Environmental Design** Anatol Rapoport, 2013-06-29 This book is about a new and different way of approaching and studying the history of the built environment and the use of historical precedents in design However although what I am proposing is new for what is currently called architectural history both my approach and even my conclusions are not that new in other fields as I discovered when I attempted to find supporting evidence In fact of all the disciplines dealing with various aspects of the study of the past architectural history seems to have changed least in the ways I am advocating There is currently a revival of interest in the history of architecture and urban form a similar interest applies to theory vernacular design and culture environment relations After years of neglect the study of history and the use of historical precedent are again becoming important However that interest has not led to new approaches to the subject nor have its bases been examined This I try to do In so doing I discuss a more rigorous and I would argue a more valid way of looking at historical data and hence of using such data in a theory of the built environment and as precedent in environmental design Underlying this is my view of Environment Behavior Studies CEBS as an emerging theory rather than as data to help design based on current theory Although this will be the subject of another book a summary statement of this position may be useful Historical Judgement Jonathan Gorman, 2014-11-27 The historical profession is not noted for examining its own methodologies Indeed most historians are averse to historical theory In *Historical Judgement* Jonathan Gorman s response to this state of affairs is to argue that if we want to characterize a discipline we need to look to persons who successfully occupy the role of being practitioners of that discipline So to model historiography we must do so from the views of historians Gorman begins by showing what it is to model a discipline by using recent philosophy of law and philosophy of science There are different models at work whose rivalry and resolution are to be

historically understood With this approach in place he is able to develop the history of historiography and explore the character of historiography as presented by historians He reveals that historians conform to various norms that historians now and in the past have agreed and disagreed about the same set of interrelated matters truth telling moral judgement and the synthesis of facts and it is this internal understanding that we need to recover if we are to arrive at a correct characterization of the discipline of historiography Demonstrating how the practice of historiography requires choices and therefore the exercise of judgement Gorman is able to show that in their making of judgements historians enjoy the immense benefit of hindsight He shows how in reflecting on their own discipline historians have typically failed to attend adequately to the history of historiography neglecting to situate previous historians within their historical contexts or to pay adequate attention to the fact that present historians too are within a context that will change In addition Gorman s approach which emphasizes the power and necessity of choice and which rests on the pragmatic holistic empiricism of Quine shows postmodernism not to be the threat that some historians feel it to be indeed it is shown to be a radical form of empiricism Gorman shows how the historical enterprise may be established in our factual and moral understanding in the light of our choices and commitments to a shared world Historical Judgement is an original and important contribution to the philosophy of history By bringing together the ideas of historians and philosophers Gorman presents a much more practitioner focused examination of the discipline of history one that will hopefully encourage historians to think more about the nature of what they do

The Philosophical Structure of Historical Explanation Paul A. Roth, 2019-10-15 In The Philosophical Structure of Historical Explanation Paul A Roth resolves disputes persisting since the nineteenth century about the scientific status of history He does this by showing why historical explanations must take the form of a narrative making their logic explicit and revealing how the rational evaluation of narrative explanation becomes possible Roth situates narrative explanations within a naturalistic framework and develops a nonrealist irrealist metaphysics and epistemology of history arguing that there exists no one fixed past but many pasts The book includes a novel reading of Thomas S Kuhn s The Structure of Scientific Revolutions showing how it offers a narrative explanation of theory change in science This book will be of interest to researchers in historiography philosophy of history philosophy of science philosophy of social science and epistemology

The Third Lens Mika Aaltonen, 2017-03-02 Advancing new sense making tools for organizational strategy this book demonstrates how to deal with asymmetric threats and opportunities It employs participatory methods and multiple sector strategies to shift strategic thinking into considering disorder complexity and chaos The contributors examine whether the third lens or ontology of a project its nature work and strategic landscape should influence the two other lenses our epistemological and methodological choices that create an understanding of the world we live in The book also considers the importance of time in particular spatio temporal relations that serve as reflection points for sense making and strategic decision making both with respect to the situation in which they take place and as conceptual vehicles for managing multiple

times and realities Written for 21st century strategists this volume will benefit people and organizations who struggle daily with multiple co existing ontological epistemological and methodological discourses Theory of the History Classroom Manuel Köster,Holger Thünemann,Meik Zülsdorf-Kersting,2022-03-10 This volume proposes a theory of history education in formal classroom settings Specifically it aims to outline how the particular setting of the classroom interacts with domain specific processes of historical thinking The theory rests on the notion that formal school education is a communicative and social system while historical thinking occurs in the psychological system of a person s historical consciousness In the complex interaction of these systems historical thinking emotions communication media and language are of particular importance Drawing upon educational theory as well as the theory of history this theory of the history classroom provides a framework as well as a solid foundation for future empirical research both for developing research questions as well as for interpreting findings Pattern and Meaning in History (RLE Social Theory) H.P. Rickman,2020-07-26 One may state Dilthey s significance in most general fashion by characterizing his work as the first thorough going and sophisticated confrontation of history with positivism and natural science Dilthey s sweep was universal he strove to reduce to order the multifarious realms of knowledge the conflicting traditions of cultural study that he had embraced Thus Dilthey laid out a program that no mortal and certainly no one whose mind had been formed in the third quarter of the nineteenth century could hope to bring to completion Yet despite its inconclusiveness Dilthey s work exerted enormous influence The distinction he had drawn between natural and cultural science became standard for historians and to a lesser extent for social scientists also After Dilthey historians no longer needed to apologize for the unscientific character of their discipline they understood why its methods could never be quite the same as those of natural science And the contemporary tradition of intellectual history grew naturally out of Dilthey s teaching H Stuart Hughes
