The Emerging Response To Child Labour Conditions O:

The Child and the State in India Myron Weiner, 2021-02-09 India has the largest number of non schoolgoing working children in the world Why has the government not removed them from the labor force and required that they attend school as have the governments of all developed and many developing countries To answer this question this major comparative study first looks at why and when other states have intervened to protect children against parents and employers By examining Europe of the nineteenth century the United States Japan and a number of developing countries Myron Weiner rejects the argument that children were removed from the labor force only when the incomes of the poor rose and employers needed a more skilled labor force Turning to India the author shows that its policies arise from fundamental beliefs embedded in the culture rather than from economic conditions Identifying the specific values that elsewhere led educators social activists religious leaders trade unionists military officers and government bureaucrats to make education compulsory and to end child labor he explains why similar groups in India do not play the same role *Working Children* Chandragupt S. The Whiteness of Child Labor Reform in the New South Shelley Sallee, 2004-01-01 Focusing on Alabama s textile industry this study looks at the complex motivations behind the whites only route taken by the Progressive reform movement in the South In the early 1900s northern mill owners seeking cheaper labor and fewer regulations found the South s doors wide open Children then comprised over 22 percent of the southern textile labor force compared to 6 percent in New England Shelley Sallee explains how northern and southern Progressives who formed a transregional alliance to nudge the South toward minimal child welfare standards had to mold their strategies around the racial and societal preoccupations of a crucial ally white middle class southerners Southern whites of the better sort often regarded white mill workers as something of a race unto themselves degenerate and just above blacks in station To enlist white middle class support says Sallee reformers had to address concerns about social chaos fueled by northern interference the empowerment of white trash or the

alliance of poor whites and blacks The answer was to couch reform in terms of white racial uplift and to persuade the white middle class that to demean white children through factory work was to undermine whiteness generally The lingering effect of this whites only strategy was to reinforce the idea of whiteness as essential to American identity and the politics of reform Sallee s work is a compelling contribution to and the only book length treatment of the study of child labor reform racism and political compromise in the Progressive era South Maternity and Work International Labour Office,1994 Concern to protect working women in connection with pregnancy and childbirth appeared when women first entered factory employment and was reflected in the provision of maternity leave in some countries Over time maternity protection evolved to include measures to protect the pregnant woman s health so that work does not harm the development of the foetus
