Richard Frim, 2021-12-12 First Published in 1996 In identifying the causes of such a national and international failure in conflict management The South Slav Conflict becomes a valuable case study in comparative politics and international relations Edited by Raju G C Thomas and H Richard Frim and is unique among these by virtue of its thoroughly interdisciplinary approach to the causes and consequences of the war The book s great strength begins with its forthright assertion that no serious attempt to explain the current cycle of genocide and revenge among Serbs Croats and Bosnians can avoid the inherent complexity of the factors that transform ed Yugoslavia from one of the most pluralist of European communist states into a theater of human misery *Handbook of Wastewater Reclamation and Reuse* Donald R. Rowe, Isam Mohammed Abdel-Magid, 2020-07-09 This comprehensive reference provides thorough coverage of water and wastewater reclamation and reuse It begins with an introductory chapter covering the fundamentals basic principles and concepts Next drinking water and treated wastewater criteria guidelines and standards for the United States Europe and the World Health Organization WHO are presented Chapter 3 provides the physical chemical biological and bacteriological characteristics as well as the radioactive and rheological properties of water and wastewater The next chapter discusses the health aspects and removal treatment processes of microbial chemical and radiological constituents found in reclaimed wastewater Chapter 5 discusses the various wastewater treatment processes and sludge treatment and disposal Risk assessment is covered in chapter 6 The next three chapters cover the economics monitoring sampling and analysis and legal aspects of wastewater reclamation and reuse This practical handbook also presents real world case studies as well as sources of information for research potential sources for research funds and information on current research projects Each chapter includes an introduction end of chapter problems and references making this comprehensive text reference useful to both students and professionals *Controlling Illegal Drugs* Sandro Segre, This study presents and compares the drug policies in use in the United States Sweden and Italy to limit the use and abuse of substances such as marijuana hashish cocaine heroin and amphetamines It also focuses on attempts to suppress the traffic in these drugs A primary objective of Segre s work is theoretical to evaluate and explain by means of a comparative method applied to the study of individual cases the respective level of success of these policies measured according to conventional criteria The aim of this comparison between Swedish drug policies a positive case and U S and Italian policies negative cases is to evaluate the effect of these policies on drug use Segre comes to the general conclusion that there is a causal relationship between drug use and drug control This is deduced from the association between Swedish policies and the limited diffusion of narcotics in Sweden on the one hand and from the

association between U S and Italian policies and the wide diffusion of these substances in the United States and in Italy on the other hand This study does not aim to give a complete explanation of the high or low use of narcotics But what Segre does say is that the level of drug consumption could be a consequence of other causes which are considered here not as independent variables but on the contrary as intervening variables The literature in this field needs to dwell particularly on social and psychological causes Examples are the influence of parents and peers attitudes toward the use of drugs or abstention from them the positive or negative images that persons have of themselves and the possibility or rather the difficulty of establishing significant forms of interpersonal communication This is a modest serious contribution to the vexing issue of the causes of drug use in advanced societies Proceedings-ecology and Management of Annual Rangelands
