**Evolution** Donald R. Prothero, 2017-08-22 Donald R Prothero s Evolution is an entertaining and rigorous history of the transitional forms and series found in the fossil record Its engaging narrative of scientific discovery and well grounded analysis has led to the book s widespread adoption in courses that teach the nature and value of fossil evidence for evolution Evolution tackles systematics and cladistics rock dating neo Darwinism and macroevolution It includes extensive coverage of the primordial soup invertebrate transitions the development of the backbone the reign of the dinosaurs and the transformation from early hominid to modern human The book also details the many alleged missing links in the fossil record including some of the most recent discoveries that flesh out the fossil timeline and the evolutionary process In this second edition Prothero describes new transitional fossils from various periods vividly depicting such bizarre creatures as the Odontochelys or the turtle on the half shell fossil snakes with legs and the Frogamander a new example of amphibian transition Prothero s discussion of intelligent design arguments includes more historical examples and careful examination of

the experiments and observations that are exploited by creationists seeking to undermine sound science education With new perspectives Prothero reframes creationism as a case study in denialism and pseudoscience rather than a field with its own intellectual dynamism The first edition was hailed as an exemplary exploration of the fossil evidence for evolution and this second edition will be welcome in the libraries of scholars teachers and general readers who stand up for sound science in this post truth era

Consecrating Science Lisa H. Sideris,2017-08-15 In *Consecrating Science* Lisa Sideris offers a searing critique of The New Cosmology a complex network of overlapping movements that claim to bring together science and spirituality all in the name of saving our planet from impending ecological collapse Highly regarded in many academic circles these movements have been endorsed by numerous prominent scholars scientists historians and educators Their express goal popularized in numerous books films TED talks YouTube videos podcasts and even introductory courses at places like Harvard or Washington University is to instill in readers and audiences a profound sense of being at home in the universe thereby fostering environmentally responsible behavior Whether promoted as The New Story The Universe Story or The Epic of Evolution they all offer humanity a new sacred story a common creation myth for modern times and for all people the evolutionary unfolding of the universe from the Big Bang to the present Evolutionary science and religious cosmology together at last But as Sideris shows however the New Cosmology actually underwrites a staggeringly anthropocentric vision of the world Instead of cultivating an ethic of respect for nature the project of consecrating science only increases human arrogance and indifference to nonhuman life Going back to the work of Rachel Carson and other naturalists the author shows how a sense of wonder rooted in the natural world and our own ethical impulses helps foster environmental attitudes and policies that protect our planet Provided by publishe

**Essential Diabetes Leadership** Laurence D. Chalem,2009-09-05 Incredibly accessible and straightforward Laurence D Chalem s second book *Essential Diabetes Leadership* is the quintessential overview of diabetes Whether you or a loved one has recently been diagnosed with diabetes or whether it is something you have managed for years this book provides insight on how to live optimally with diabetes In this powerful and empowering treatise the author traces data from the last three centuries and explains where to find credible information from all channels of information Meticulously researched and fully annotated Chalem s analysis also investigates the most influential diabetes study in the world Here is where questions are answered and diabetics become the leaders of their wellness Nearly the entire diabetes treatment industry is biased in favor of their particular interests and that hands down the optimal treatment of diabetes is a diet low in carbohydrates high in fat and one that takes the middle ground in regards to protein

*The New Sciences of Religion* W. Grassie,2010-11-22 Performing a critical analysis of new scientific research on religious and spiritual phenomena Grassie takes a two staged phenomenological approach working from the outside in and the bottom up without privileging at the outset any religious traditions or philosophical assumptions

Ancestors and Relatives Eviatar Zerubavel,2012-01-26 Noted social scientist Eviatar Zerubavel casts a critical eye on how we trace our past

individually and collectively arguing that rather than simply find out who our ancestors are from genetics or history we actually create the stories that make them our ancestors

**Why Evolution is True** Jerry A. Coyne, 2010-01-14 For all the discussion in the media about creationism and Intelligent Design virtually nothing has been said about the evidence in question the evidence for evolution by natural selection Yet as this succinct and important book shows that evidence is vast varied and magnificent and drawn from many disparate fields of science The very latest research is uncovering a stream of evidence revealing evolution in action from the actual observation of a species splitting into two to new fossil discoveries to the deciphering of the evidence stored in our genome Why Evolution is True weaves together the many threads of modern work in genetics palaeontology geology molecular biology anatomy and development to demonstrate the indelible stamp of the processes first proposed by Darwin It is a crisp lucid and accessible statement that will leave no one with an open mind in any doubt about the truth of evolution

*Using the Biological Literature* Diane Schmidt, 2014-04-14 The biological sciences cover a broad array of literature types from younger fields like molecular biology with its reliance on recent journal articles genomic databases and protocol manuals to classic fields such as taxonomy with its scattered literature found in monographs and journals from the past three centuries *Using the Biological Literature A Practical Guide* Fourth Edition is an annotated guide to selected resources in the biological sciences presenting a wide ranging list of important sources This completely revised edition contains numerous new resources and descriptions of all entries including textbooks The guide emphasizes current materials in the English language and includes retrospective references for historical perspective and to provide access to the taxonomic literature It covers both print and electronic resources including monographs journals databases indexes and abstracting tools websites and associations providing users with listings of authoritative informational resources of both classical and recently published works With chapters devoted to each of the main fields in the basic biological sciences this book offers a guide to the best and most up to date resources in biology It is appropriate for anyone interested in searching the biological literature from undergraduate students to faculty researchers and librarians The guide includes a supplementary website dedicated to keeping URLs of electronic and web based resources up to date a popular feature continued from the third edition

**Comprehensive Global Perspective: An Illuminating Worldview** Tiffany Twain, 2013-01-24 This was the original magnum opus of Earth Manifesto understandings This book contains entertaining stories incisive insights philosophical introspections and biggest picture perspectives of all the great issues that face human beings and our civilizations today

*Politics by Other Means* William Grassie, 2010-03-31 *Politics by Other Means* explores profound issues at the interface of contemporary religion and science from a global perspective Brought together and thematically organized in this volume are twenty four essays that were originally presented at conferences in China Germany India Indonesia Iran Israel Lebanon and Sri Lanka Many of the essays are more journalistic in tone and content while others adopt a more academic prose style and approach All are provocative and iconoclastic challenging scientific and religious

orthodoxies exploring the great cultural ambivalences at the intersection of the domains of science and religion and holding out the possibility of a transformative politics for addressing the great challenges of the twenty first century *Read On...History* Tina Frolund,2013-10-21 Make history come alive This book helps librarians and teachers as well as readers themselves find books they will enjoy titles that will animate and explain the past entertain and expand their minds This invaluable resource offers reading lists of contemporary and classic non fiction history books and historical fiction covering all time periods throughout the world and including practically all manner of human endeavors Every book included is hand selected as an entertaining and enlightening read Organized by appeal characteristics this book will help readers zero in on the history books they will like best for instance titles that emphasize character tell a specific type of historical story convey a mood or are presented in a particular setting Every book listed has been recommended based on the author s research and has proved to be a satisfying and worthwhile read *The Tyranny of God* Marquez Comelab,2010-02-01 This book explores the truth behind our beliefs in God and the propensity of human beings to be religious In an honest attempt to seek the answers to life s deepest questions the author probes into how life began It then progresses to investigate the nature of religions and writes that because we refuse to accept our mortality we delude ourselves and we coerce others with the tyranny of our own beliefs **Law's Meaning of Life** Ngaire Naffine,2009-01-06 The perennial question posed by the philosophically inclined lawyer is What is law or perhaps What is the nature of law This book poses an associated but no less fundamental question about law which has received much less attention in the legal literature It is Who is law for Whenever people go to law they are judged for their suitability as legal persons They are given or refused rights and duties on the basis of ideas about who matters These ideas are basic to legal decision making they form the intellectual and moral underpinning of legal thought They help to determine whether law is essentially for rational human beings or whether it also speaks to and for human infants adults with impaired reasoning the comotose fetuses and even animals Are these the right kind of beings to enter legal relationships and so become legal persons Are they for example sufficiently rational or sacred or simply human Is law meant for them This book reveals and evaluates the type of thinking that goes into these fundamental legal and metaphysical determinations about who should be capable of bearing legal rights and duties It identifies and analyses four influential ways of thinking about law s person each with its own metaphysical suppositions One approach derives from rationalist philosophy a second from religion a third from evolutionary biology while the fourth is strictly legalistic and so endeavours to eschew metaphysics altogether The book offers a clear coherent and critical account of these complex moral and intellectual processes entailed in the making of legal persons **Darwinian Detectives** Norman A. Johnson,2007-07-06 Biology is often viewed today as a bipartisan field with molecular level genetics guiding us into the future and natural history including ecology evolution and conservation biology chaining us to a descriptive scientific past In *Darwinian Detectives* Norman Johnson bridges this divide revealing how the tried and true tools of natural history make sense of the newest

genomic discoveries      *Physick to Physiology* Keith Dorrington, 2023-10-19 A murder in Main Quad a near demise high on Mont Blanc the lady who survived hanging and became a celebrity Lord Nuffield's dreadful visits to the dentist and the surgeon who operated on his own hernia using strychnine all pointers to medical mysteries and advances This book aims to entertain and inform the reader interested in the advancement of medical science The author presents seven distinct areas of endeavour in which he has been involved during an Oxford career undertaking original research in engineering materials science anaesthesia and physiology while working as a tutor and practising doctor Each topic is presented and illustrated with novel insights from a historical and often fascinating background extending up to medical controversies of the present day A final section takes a personal look at the factors which contribute to Oxford's extraordinary ability to nurture medical science

**Siona's Tale** Barbara A. Liepe, PhD, 2018-02-23 Siona the human girl fears what her mother loves most the sea Her fears escalate after her bloody encounter with a ragworm at the beach Her marine biologist mother on the verge of a scientific breakthrough in metabolic evolution starts a story Siona's Tale about a tiny sea squirt hoping that her daughter may marvel at the wonders of the sea and the powerful connection all creatures share Siona's Tale is an adventure in science and fiction Siona the Sea Squirt hatches out of her egg 521 2 million years ago her creation the result of a rare horizontal gene transfer event Life is hard on sea squirts but particularly hard on Siona That's because she loves to swim with her mighty tail She is devastated when she learns that she must lose her tail stick her head to a rock and never swim again That's just what happens to sea squirts when they grow up Against all odds Siona sets out on a journey to save her beloved tail making friends along the way with a cast of marine invertebrates including a clairvoyant clam and a prophetic trilobite Siona encounters toxic slime lash like flagella predatory spiders pistol toting shrimp photons from wee sea beasties mutants DNA and ATP improbable events dumb luck friendship love and her destiny a destiny upon which the human race depends It is a story that feels like an actual experience Its unique compelling and thought provoking We want young people and people of all ages to read this book Think of the nerdy youth out there waiting for a book like this Dr Charlene Stone biology teacher at Canyon Del Oro High School
