**The Stone Circles of Britain, Ireland, and Brittany** Aubrey Burl, 2000-01-01

The spectacular stone circles of western Europe, some nearly 6000 years old, have intrigued viewers through the ages. This beautiful book about these megalithic rings explores their ancestry, methods of construction, and eventual desertion. A substantially revised version of Aubrey Burl's highly praised work *The Stone Circles of the British Isles*, it offers new insights into the purpose of stone circles. It also provides a new interpretation of Stonehenge and of Callanish in Scotland, the first overview of the cromlechs in Brittany, a discussion of the problems of archaeoastronomy as related to stone circles, a greatly expanded Gazetteer, and an up-to-date list of radiocarbon dates and recent excavations.

**The Mystery of Doggerland** Graham Phillips, 2023-07-25

A scientific exploration of the advanced ancient civilization known as Doggerland or Fairland that disappeared 5000 years ago. Looks at the latest archaeological and scientific evidence preserved beneath the North Sea and on the tiny island of Fair Isle. Examines Doggerland's sophisticated technology, including how its people were able to melt solid rock to create vitrified structures far stronger than concrete. Shows how the survivors of the destruction of Doggerland sailed to the British Isles and established the megalithic culture that built Stonehenge. New marine archaeological evidence has revealed the remains of a large landmass to the north of Britain that hosted an advanced civilization 1000 years before the recognized first civilizations of

ancient Egypt Mesopotamia or India Remembered in Celtic legends as Tu lay and referred to by geologists as Doggerland or Fairland this civilization began at least as early as 4000 BCE but was ultimately destroyed by rising sea levels huge tsunamis and a terrible viral epidemic released from melting permafrost during a cataclysmic period of global warming Exploring the latest archaeological findings and recent scientific analysis of Doggerland s underwater remains Graham Phillips shows that this ancient culture had sophisticated technology and advanced medical knowledge He looks at evidence detected with remote sensing and seismic profiling of many artificial structures complex settlements gigantic earthworks epic monoliths and huge stone circles dated to more than 5 500 years ago preserved beneath the ground and on the ocean floor He also looks at the small part of the Fairland landmass that still exists Fair Isle a tiny island some 45 miles north of the Orkney Islands of Scotland Phillips shows how when Fairland sank beneath the waves around 3100 BCE its last survivors traveled by boat to settle in the British Isles where they established the megalithic culture that built Stonehenge Revealing the vast archaeological evidence in support of the existence of Doggerland as well as its threads of influence in early cultures around the world Phillips also shows how the fate of this sophisticated ancient culture is a warning from history the cataclysmic events that happened to the first civilizations could happen again as the world heats up
