Warfare in the Ancient World Stefan G. Chrissanthos, 2008-10-30 From the clash of bronze weapons on bronze armor to the fall of Rome war often decided the course of ancient history This volume is a practical introduction to the study of warfare in the ancient world beginning with Egypt and Mesopotamia and tracing the advances made in battle tactics technology and government over hundreds of years culminating with developments in Greece and the Roman Empire The chronological structure allows the reader to trace certain general themes down through the centuries how various civilizations waged war who served in the various armies and why who the generals and officers were who made the decisions in the field what type of government controlled these armies and from what type of society they sprang Major events and important individuals are discussed in their historical contexts providing a complete understanding of underlying causes and enabling readers to follow the evolution of ancient warfare as armies and empires became steadily larger and more sophisticated Yet as Chrissanthos makes clear history comes full circle during this period Rome s collapse in 476 C E inaugurated an unforeseen dark age in which great armies were left decimated despite advanced technology that while proving decisive in the outcome of many critical battles and stand offs had vanished amidst the Empire s crumbling walls In addition to the chronological treatment

Chrissanthos also includes sections on such important topics as chariot warfare cavalry naval warfare elephants in battle the face of battle and such vital but often overlooked topics as the provisioning of the army with sufficient food and water Eyewitness accounts are incorporated throughout each chapter allowing the reader brief glimpses into the life and times of peasants and soldiers generals and politicians all of whom were dealing with war and its irreconcilable consequences from differing vantage points Battle diagrams and maps are carefully placed throughout the text to help the reader visualize particular aspects of ancient warfare The book also furnishes a detailed timeline and an extensive bibliography containing both modern and ancient sources

use of large multi register corpora including the British National Corpus and the reporting of the 2003 invasion of Iraq by Australian US European and Asian news sources Combining detailed text analysis with corpus linguistic methods it provides an empirical analysis showing the astonishing reach of our ideologies of war and their profoundly covert and coercive power

City and Country Alexander R. Thomas, Gregory M. Fulkerson, 2021-06-17 City and Country The Historical Evolution of Urban Rural Systems begins with a simple assumption every human requires on average two thousand calories per day to stay alive Tracing the ramifications of this insight leads to the caloric well the caloric demand at one point in the environment As population increases the depth of the caloric well reflects this increased demand and requires a population to go further afield for resources a condition called urban dependency City and Country traces the structural ramifications of these dynamics as the population increased from the Paleolithic to today We can understand urban dependency as the product of the caloric demands a population puts on a given environment and when those demands outstrip the carry capacity of the environment a caloric well develops that forces a community to look beyond its immediate area for resources As the well deepens the horizon from which resources are gathered is pushed further afield often resulting in conflict with neighboring groups Prior to settled villages increases in population resulted in cultural technological innovations that allowed for greater use of existing resources the broad spectrum revolution circa 20 thousand years ago the birth of agricultural villages 11 thousand years ago and hierarchically organized systems of multiple settlements working together to produce enough food during the Ubaid period in Mesopotamia seven thousand years ago the first urban rural systems As cities developed increasing population resulted in an ever deepening morass of urban dependency that required expansion of urban rural systems These urban rural dynamics today serve as an underlying logic upon which modern capitalism is built The culmination of two decades of research into the nature of urban rural dynamics City and Country argues that at the heart of the logic of capitalism is an even deeper logic urbanization is based on urban dependency Hellenistic Constructs Paul Cartledge, Peter Garnsey, Erich S. The Road from Eden John Barber,2008 Aluta Continua Biblical Hermeneutics for Liberation Obvious Vengeyi,Joachim Kügler,2013 This book was passed as a PhD thesis at Bayreuth University Germany The author challenges African Biblical scholars and Christian leaders to premise Biblical interpretation on the experiences of the often neglected underclasses The author argues that from a comparative historical cultural and material methodological point of view the experiences of the Zimbabwean underclasses whose collective ordeal is represented by the experiences of domestic workers are strikingly similar to those suffered by slaves among other underclasses in the biblical world In the same way religion was appropriated by the elite to validate oppression of the underclasses in the biblical world the author shows that since the colonial era Christianity in Africa through biblical interpretation among many other tactics has been an influential force on the side of the dominant class to advance their racial class and gender interests To date in Zimbabwe for example the Bible and religion in general is manipulated by the dominant minority to justify and entrench the exploitation of the majority underclasses On the other hand the author observes that the history of ancient Israel Roman colonial Palestine and colonial Zimbabwe evidences that when religion is appropriated and or the Bible is read and interpreted from the historical cultural and material conditions of the underclasses it can be a valuable resource not only for their mobilization to overthrow oppressive systems but also for justifying their resistance tactics Aluta Continua The Struggle goes on
