Wheatland Assisted by Barbara Carson** David P. Wheatland, 1968 *The Apparatus of Science at Harvard, 1765-1800* Harvard University, David P. Wheatland, 1968 **A Companion to the History of American Science** Georgina M. Montgomery, Mark A. Largent, 2019-09-23 A Companion to the History of American Science offers a collection of essays that give an authoritative overview of the most recent scholarship on the history of American science Covers topics including astronomy agriculture chemistry eugenics Big Science military technology and more Features contributions by the most accomplished scholars in the field of science history Covers pivotal events in U S history that shaped the development of science and science policy such as WWII the Cold War and the Women s Rights movement **Science at Harvard University** Clark A. Elliott, Margaret W. Rossiter, 1992-02 This collection of original historical essays examines aspects of the relationship between science and the nation s oldest academic institution This is history as viewed from the varying perspectives of a group of scholars for whom science at Harvard University is a significant component of their ongoing research Thus the essays are of specialist interest while collectively the volume is a case study of science in an institutional setting In conducting their research the authors have used a wealth of primary sources from the Harvard Archives and other repositories The volume opens with a thematic introduction by Margaret Rossiter reflecting the picture of Harvard science drawn in the several papers in the volume while suggesting ways in which a study of Harvard relates to and illuminates the history of science in America The subsequent papers follow a generally chronological sequence beginning with Sara Schechner Genuth s study of attitudes toward comets in relation to early Harvard University programs and functions Mary Ann James examines the beginnings of applied science at Harvard and Bruce Sinclair continues that theme with a comparative study of MIT and Harvard Toby Appel s paper on zoologist Jeffries Wyman identifies the special part that personal character plays in institutional history Curtis Hinsley concentrates on facilities and shows how the Peabody Museum gave rise to teaching in anthropology David Livingstone s biographical treatment of Nathaniel S Shaler reveals a number of intellectual strands running through the University in the late nineteenth century and John Parascandola s paper on L J Henderson likewise deals with a figure of wide influence and many interests ranging from biochemistry to sociology The latter topic leads to Lawrence Nichols s account of the rise of sociology at Harvard A view of the internal tensions within psychology are seen in Rodney Triplet s study of Henry A Murray I Bernard Cohen examines the relations among Howard Aiken IBM and Harvard in the development of the Mark I computer while Peggy Kidwell studies the Observatory community during World War II and its response to national defense and a developing federal support system Finally Clark Elliott

considers the history of Harvard science as a field for study through a review of published literature and archival sources and makes suggestions for further investigation

Instruments of Knowledge Jean-François Gauvin,2023-06-19 In a bid to claim scientific objects as requiring a significant amount of conceptual labor this book looks sequentially at instruments habits and museums The goal is to uncover how together these material and immaterial activities rules and commitments form one meaningful and credible blueprint revealing the building blocks of knowledge production They serve to conceptualize and examine the entire life of an instrument from its ideation and craft to its use reuse circulation recycling and if not obliterated its final entry into a museum It is such an epistemological triptych that guides this investigation

The Harvard College Observatory Bessie Zaban Jones,Lyle Gifford Boyd,1971 Since its founding in 1839 the Harvard College Observatory has pioneered in the development of modern astronomy Its first directors early recognized the potential of spectroscopy in revealing the constitution of the stars and of photography in determining the positions and motions of celestial objects the library of photographic plates made under their direction provides an invaluable history of the stellar universe for the period The Observatory also pioneered in using the talents of women several of whom became noted astronomers and their monumental classification of stars from spectral records constitutes a fundamental contribution to astronomical knowledge The authors vividly portray the genesis growth and achievements of a major scientific institution and its relations with other observatories Through the use of photographs and correspondence they also portray the men and women who played essential roles in the development of astronomy in the nineteenth and early twentieth centuries

Scientific Instruments, 1500-1900 Gerard L'Estrange Turner,1998 The impulse to collect is universal Collections containing natural curiosities date from the 16th century and it was this type of collection in which scientific instruments found a home This book traces the historical origins and development of instruments as they spread across the globe explaining their manufacture use and adaptations 91 color and 20 b w plates

The Oxford Handbook of History and Material Culture Ivan Gaskell,Sarah Anne Carter,2020-04-07 Most historians rely principally on written sources Yet there are other traces of the past available to historians the material things that people have chosen made and used This book examines how material culture can enhance historians understanding of the past both worldwide and across time The successful use of material culture in history depends on treating material things of many kinds not as illustrations but as primary evidence Each kind of material thing and there are many requires the application of interpretive skills appropriate to it These skills overlap with those acquired by scholars in disciplines that may abut history but are often relatively unfamiliar to historians including anthropology archaeology and art history Creative historians can adapt and apply the same skills they honed while studying more

traditional text based documents even as they borrow methods from these fields They can think through familiar historical problems in new ways They can also deploy material culture to discover the pasts of constituencies who have left few or no traces in written records The authors of this volume contribute case studies arranged thematically in six sections that respectively address the relationship of history and material culture to cognition technology the symbolic social distinction and memory They range across time and space from Paleolithic to Punk
