D. Bennett, 1985-12-05 The bibliography contains references to literature on British industrial relations published in the years 1971 to 1979 inclusive It includes books periodical articles theses government publications pamphlets and any other relevant publications As well as general material on industrial relations the bibliography includes material on employee attitudes and behaviour employee organisation employers and their organisation collective bargaining industrial conflict industrial democracy the labour market training employment unemployment labour mobility pay conditions and the role of the state in industrial relations It is cross referenced and has an author index It is a supplement to the volume compiled by George Bain and Gillian Woolven published by the Press in 1979 and for the years since 1980 is itself updated by annual articles in the British Journal of Industrial Relations The material is arranged by subject and chronologically within that framework **Industrial Relations Around the World** Miriam Rothman, Dennis R. Katzenstein, 2018-08-06 Dynamic technological developments in industrial production the rise of new social movements in national politics and great changes in the international political economy have left a deep imprint on the Federal Republic A compelling explanation of West Germany's success in maintaining economic prosperity and political stability under such challenging conditions has continued to elude observers Under the editorship of Peter J Katzenstein thirteen distinguished scholars from both sides of the Atlantic here provide an original interpretation of the political economy of the Bonn Republic during the forty years since its founding and explore in particular its extraordinary capacity for accommodating change Whereas studies in political economy have typically focused on one level of political action either the shop floor or national politics or the international system this innovative account analyzes the interaction of change at all three levels bringing together case studies drawn from six manufacturing and service sectors **A Theory of Employment Systems** David Marsden, 1999 A Theory of Employment Systems considers why there are such great international differences in the way employment relations are organized within the firm Taking account of the growing evidence that international diversity is not being wiped out by globalization it sets out from the theory of the firm first developed by Coase and Simon and explains why firms and workers should use the employment relationship as the basis for their economic cooperation The originality of the employment

relationship lies in its flexibility It gives managers the authority to organize work but it also establishes limits on employees obligations The author argues that these limits are provided by four basic types of employment rule Which one predominates in a given environment is the source of international diversity in employment relations Drawing upon evidence from the US Japan France Germany and Britain the theory is extended to show why such diversity extends deep into key areas of human resource management such as performance management incentive pay and skill development It also explains why the open ended employment relationship continues to dominate work despite the growth of market mediated work relations

Industrial Relations and New Technology Annette Davies, 2018-03-22 New technology arguably provided the greatest challenge to industrial relations since the formation of unions The problems raised led to a whole range of responses from rejection of the new technology to acceptance of the change with management and workers making new and sometimes unheard of agreements This book originally published in 1986 and based on extensive original research examines the changes in industrial relations which the new technology of the 1980s caused analysing the implications for the workforce and the reactions of the management and trade unions to the challenges
