H. C. Frend, 1996 Spectacular recent discoveries and a stream of material artifacts have heightened interest in what archaeology can tell us about early Christianity The first of its kind William Frend's important and engaging work tells the full story of the archaeological search for early Christianity He shows how despite nationalisms religious rivalry and personal ambition archaeology since Napoleon's time has excavated important sites and developed scientific methods to explore them He explains the important light archaeology sheds on the art architecture and social world of Christians in the Roman Empire He shows how archaeology enriches our understanding of Jewish Christian relations in the first centuries and provides clues to long ignored popular religion and non orthodox traditions of the Donatists Manichees and Monophysites And he shows how archaeology decisively corrects and modifies text based scholarly consensus on the mission of Christianity in the Roman Empire **Archaeology of Churches** Margaret Jesson, Council for British archaeology. The Church in British Archaeology Richard Morris,1983 **Church Archaeology in Transylvania (ca. 950 to ca. 1450)** Daniela Marcu-Istrate,2022-09-19 Transylvania has some of the most valuable monuments of medieval architecture in Europe The oldest church was built in the 10th century but most others came into being only after 1200 Later changes have considerably modified the appearance of still standing buildings Written sources are lacking for answers to questions about the identity of the builders and patrons Countering the idea that only standing structures can reflect the history of medieval churches in Transylvania this book uses archaeological sources in order to answer some of those questions and to bring to light the hidden past of many monuments *The Archaeology of the Early Medieval Celtic Churches: No. 29* Nancy Edwards,2017-10-23 This volume focuses on new research on the archaeology of the early medieval Celtic churches c AD 400 1100 in Wales Ireland Scotland south west Britain and Brittany The 21 papers use a variety of approaches to explore and analyse the archaeological evidence for the origins and development of the Church in these areas The results of a recent multi disciplinary research project to identify the archaeology of the early medieval church in different regions of Wales are considered alongside other new research and the discoveries made in excavations in both Wales and beyond The papers reveal not only aspects of the archaeology of ecclesiastical landscapes with their monasteries churches and cemeteries but also special graves relics craftworking and the economy enabling both comparisons and contrasts They likewise engage with ongoing debates concerning interpretation historiography and the concept of the Celtic Church conversion to Christianity Christianization of the landscape and the changing functions and inter relationships of sites the development of saints cults sacred space and pilgrimage landscapes and the origins of the monastic town **The Oxford Handbook of Early Christian Archaeology** David K. Pettegrew,William Rodney Caraher,Thomas W. Davis,2019 This handbook brings together work by leading scholars of the archaeology of early Christianity in the Mediterranean and surrounding regions The 34 essays to this volume ground the history culture and society of the first seven centuries of Christianity in the latest currents of archaeological method theory and research *The Church in Anglo-Saxon Society* John Blair,2005-01-20 From the impact of the first monasteries in the seventh century to the emergence of the local parochial system five hundred years later the Church was a force for change in Anglo Saxon society It shaped culture and ideas social and economic behaviour and the organization of landscape and settlement This book traces how the widespread foundation of monastic sites minsters during c 670 730 gave the recently pagan English new ways of living of exploiting their resources andof absorbing European culture

as well as opening new spiritual and intellectual horizons Through the era of Viking wars and the tenth century reconstruction of political and economic life the minsters gradually lost their wealth their independence and their role as sites of high culture but grew in stature as foci of local society and eventually towns After 950 with the increasing prominence of manors manor houses and village communities a new and much larger category of small churches were founded endowed and rebuilt the parish churches of the emergent eleventh and twelfth century local parochial system In this innovative study John Blair brings together written topographical and archaeological evidence to build a multi dimensional picture of what local churches and local communities meant to each other in early England

The Church of St. Polyeuktos at Constantinople Fabian Stroth, 2024-03-13 The Church of St Polyeuktos is one of the most magnificent but also most peculiar architectural achievements in Byzantine Constantinople The accidental rediscovery of the building during construction work in Istanbul in the 1960s is legendary and considered one of the most sensational finds in Byzantine archaeology Built by the aristocrat Lady Anicia Juliana the reconstruction of the structure and the interpretation of its strange forms continue to challenge scholars today The building gave rise to a whole series of archaeological historical narratives in which the City's Byzantine protagonists and major monuments were woven into a coherent plot This Element on the archaeology of St Polyeuktos takes a closer look at these narratives and subject them to critical examination In the end the study of St Polyeuktos will tell us as much about Byzantine architectural history in the second half of the twentieth century as about early Byzantine architecture itself

Myth, Rulership, Church and Charters Andrew Wareham, 2017-03-02 For more than forty years Nicholas Brooks has been at the forefront of research into early medieval Britain In order to honour the achievements of one of the leading figures in Anglo Saxon studies this volume brings together essays by an internationally renowned group of scholars on four themes that the honoree has made his own myths rulership church and charters Myth and rulership are addressed in articles on the early history of Wessex the fall of Mercia and the battle of Brunanburh contributions concerned with charters explore the means for locating those hitherto lost the use of charters in the study of place names their role as instruments of agricultural improvement and the reasons for the decline in their output immediately after the Norman Conquest Nicholas Brooks's long standing interest in the church of Canterbury is reflected in articles on the Kentish minster of Reculver which became a dependency of the church of Canterbury on the role of early tenth century archbishops in developing coronation ritual and on the presentation of Archbishop Dunstan as a prophet Other contributions provide case studies of saints' cults with regional and international dimensions examining a mass for St Birinus and dedications to St Clement while several contributions take a wider perspective looking at later interpretations of the Anglo Saxon past both in the Anglo Norman and more modern periods This stimulating and wide ranging collection will be welcomed by the many readers who have benefited from Nicholas Brooks's own work or who have an interest in the Anglo Saxon past more generally It is an outstanding contribution to early medieval studies

Urban Growth and the Medieval

Church Nigel Baker, Richard Holt, 2017-05-15 It has long been recognised that the Church played a major role in the development of towns and cities from the earliest times a fact attested to by the prominence and number of ecclesiastical buildings that still dominate many urban areas Yet despite this physical evidence and the work of archaeologists and historians many important aspects of the early stages of urbanization in England are still poorly understood Not least there are many unanswered questions concerning the processes by which the larger towns emerged as planned settlements during the pre Conquest centuries Whilst the commitment of the Wessex kings is recognized questions remain concerning the participation of the Church in this process Likewise our understanding of the Church's influence in the later development of towns is not yet fully developed Many intriguing questions remain concerning such issues as the founding of parish churches and their boundaries and the extent to which the Church as a major landowner helped shape the evolving identity of towns and their suburbs It is questions such as these that this volume sets out to answer Employing a wealth of historical and archaeological evidence two key towns Gloucester and Worcester are closely examined in order to build up a picture of their respective developments throughout the medieval period Through this multi disciplinary and comparative approach a picture begins to emerge the Church's role in helping to shape not only the spiritual but also the social economic and cultural development of the urban environment

The Oxford Dictionary of the Christian Church Frank Leslie Cross, Elizabeth A. Livingstone, 2005 Uniquely authoritative and wide ranging in its scope The Oxford Dictionary of the Christian Church is the indispensable one volume reference work on all aspects of the Christian Church It contains over 6 000 cross referenced A Z entries and offers unrivalled coverage of all aspects of this vast and often complex subject including theology churches and denominations patristic scholarship the bible the church calendar and its organization popes archbishops saints and mystics In this revision innumerable small changes have been made to take into account shifts in scholarly opinion recent developments such as the Church of England's new prayer book Common Worship RC canonizations ecumenical advances and mergers and where possible statistics A number of existing articles have been rewritten to reflect new evidence or understanding for example the Holy Sepulchre entry and there are a few new articles Perhaps most significantly a great number of the bibliographies have been updated Established since its first appearance in 1957 as an essential resource for ordinands clergy and members of religious orders ODCC is an invaluable tool for academics teachers and students of church history and theology as well as for the general reader
