Above the entrance is a row of three smaller arched windows. The upper story features a large, pointed Gothic archway containing a circular window with a five-pointed star design. To the left and right of this central arch are more windows, some with decorative tracery. The building is constructed of light-colored stone or brick. The sky is a clear, bright blue. The title 'THE ARCHITECTURE OF DEANE & WOODWARD' is overlaid in white serif font across the upper portion of the image.

## **The Architecture Of Deane And Woodward:**

The Architecture of Deane and Woodward Frederick O'Dwyer,1997 The Architecture of Deane and Woodward chronicles the development of one of the nineteenth century s most influential architectural practices from Deane and Woodward s first designs for the Irish provincial elite to their world famous buildings in Dublin *The Architecture of Deane and Woodward, 1845-1861* Eve Marion Blau,1978 **Ruskinian Gothic** Eve Blau,1982 **The Architecture of Deane and Woodward, 1845-1861** Eve Blau,1978 Ruskinian Gothic Eve Blau,1982 *Louis H. Sullivan and a 19th-Century Poetics of Naturalized Architecture* LaurenS. Weingarden,2017-07-05 For most of the twentieth century modernist viewers dismissed the architectural ornament of Louis H Sullivan 1856 1924 and the majority of his theoretical writings as emotional outbursts of an outmoded romanticism In this study Lauren Weingarden reveals Sullivan s eloquent articulation of nineteenth century romantic practices literary linguistic aesthetic spiritual and nationalistic and thus rescues Sullivan and his legacy from the narrow role imposed on him as a pioneer of twentieth century modernism Using three interpretive models discourse theory poststructural semiotic analysis and a pragmatic concept of sign functions she restores the integrity of Sullivan s artistic choices and his historical position as a culminating figure within nineteenth century romanticism By giving equal weight to Louis Sullivan s writings and designs Weingarden shows how he translated both Ruskin s tenets of Gothic naturalism and Whitman s poetry of the American landscape into elemental structural forms and organic ornamentation Viewed as a site where various romantic discourses converged Sullivan s oeuvre demands a cross disciplinary exploration of each discursive practice and its rules of accumulation exclusion reactivation The overarching theme of this study is the interrogation and restitution of those Foucauldian rules that enabled Sullivan to articulate architecture as a pictorial mode of landscape art which he considered co equal with the spiritual and didactic functions of landscape poetry Architecture and Interpretation Jill Franklin,T. A. Heslop,Christine Stevenson,2012 Essays centred on the methods pleasures and pitfalls of architectural interpretation **The Victorian Palace of Science** Edward J. Gillin,2017-11-09 The Palace of Westminster home to Britain s Houses of Parliament is one of the most studied buildings in the world What is less well known is that while Parliament was primarily a political building when built between 1834 and 1860 it was also a place of scientific activity The construction of Britain s legislature presents an extraordinary story in which politicians and officials laboured to make their new Parliament the most radical modern building of its time by using the very latest scientific knowledge Experimentalists employed the House of Commons as a chemistry laboratory geologists argued over the Palace s stone natural philosophers hung meat around the building to measure air purity and mathematicians schemed to make Parliament the first public space where every room would have electrically controlled time Through such dramatic projects Edward J Gillin redefines our understanding of the Palace of Westminster and explores the politically troublesome character of Victorian science **The Oxford Dictionary of Architecture** James Stevens Curl,Susan Wilson,2015-02-26 Containing over 6 000 entries from Aalto

**Victorian Visions of**

**Suburban Utopia** Nathaniel Robert Walker, 2020-11-17 The rise of suburbs and disinvestment from cities have been defining features of life in many countries over the course of the twentieth century In Victorian Visions of Suburban Utopia Nathaniel Walker asks why did we abandon our dense complex urban places and seek to find the best of the city and the country in the flowery suburbs While looking back at the architecture and urban design of the 1800s offers some answers Walker argues that a great missing piece of the story can be found in Victorian utopian literature The replacement of cities with high tech suburbs was repeatedly imagined and breathlessly described in the socialist dreams and science fiction fantasies of dozens of British and American authors Some of these visionaries such as Robert Owen Edward Bulwer Lytton Edward Bellamy William Morris Ebenezer Howard and H G Wells are enduringly famous while others were street vendors or amateur chemists who have been all but forgotten Together they fashioned strange and beautiful imaginary worlds built of synthetic gemstones lacy metal colonnades and unbreakable glass staffed by robotic servants and teeming with flying carriages As varied as their futuristic visions could be Walker reveals how most of them were unified by a single desperate plea for humanity to have a future worth living we must abandon our smoky poor chaotic Babylonian cities for a life in shimmering gardens

**Newman**

**University Church, Dublin** Niamh Bhalla, 2024-07-01 In 1854 John Henry Newman one of the foremost intellectual figures of the nineteenth century was officially installed as the rector of the first Catholic university in Ireland University Church constructed in 1855 6 was Newman s first objective when he agreed to the rectorship and it can be considered as a tangible manifestation of the idea behind the unprecedented Catholic university in Dublin the posing of an erudite Catholic alternative to post Enlightenment secularism and Protestant hegemony through a style based analogy to the early Church Despite physically embodying what Newman wished to achieve in and through his new university this early Christian style church which drew upon Roman and Byzantine basilicas has received little attention This book charts for the first time the significant place that the building occupies within the history of Victorian revivalist architecture Niamh Bhalla explores the meaningful connection between the church s context and the ambiguity of its early Christian style In the intersection of these two things a significant monument was created The study of University Church therefore provides an effective lens to understand more comprehensively the architectural revivalism that dominated the nineteenth century particularly the first stirrings of basilican and Byzantine revivalist architectures in the British Isles Praise for Newman University Church Dublin Newman University Church Dublin is an important contribution to the burgeoning study of historic architecture of the nineteenth century In studying the larger contexts of the church Niamh Bhalla illumines the aspirations of Cardinal Newman for the university that he directed and Catholicism in Ireland and the United Kingdom Robert S Nelson Yale University A riveting analysis of the University Church and its intellectual background Niamh Bhalla steers us effortlessly through the many strands of architectural and religious thought that lie behind Newman s church while revealing its seminal place in the

**The History of the University of Oxford: Volume VII: Nineteenth-Century Oxford, Part 2** M. G. Brock, M. C. Curthoys, 2000-11-16

Volume VII of The History of the University of Oxford completes the survey of nineteenth century Oxford begun in Volume VI After 1871 both teachers and students at Oxford were freed from tests of religious belief The volume describes the changed mental climate in which some dons sought a new basis for morality while many undergraduates found a compelling ideal in the ethic of public service both at home and in the empire As the existing colleges were revitalized and new ones founded the academic profession in Oxford developed a peculiarly local form centred upon college tutors who stood in somewhat uneasy relation with the University's professors The various disciplines which came to form the undergraduate curriculum in both the arts and sciences are subject to major reappraisal and Oxford's hidden curriculum is explored through accounts of student life and institutions including organized sport and the Oxford Union New light is shed on the social origins and previous schooling of undergraduates A fresh assessment is made of the movement to establish women's higher education in Oxford and the strategies adopted by its promoters to implant communities for women within the masculine culture of an ancient university Other widened horizons are traced in accounts of the University's engagement with imperial expansion social reform and the educational aspirations of the labour movement as well as the transformation of its press into a major international publisher The architectural developments considerable in quantity and highly varied in quality receive critical appraisal in a comprehensive survey of the whole period covered by Volumes VI and VII 1800-1914 By the early twentieth century the challenges of socialism and democracy together with the demand for national efficiency gave rise to a renewed campaign to address issues such as promoting research abolishing compulsory Greek and more generally broadening access to the University Under the terrible test of the First World War still more deep seated concerns were raised about the side effects of Oxford's educational practices and the volume concludes with some reflections on the directions which the University had taken over the previous fifty years

series blurb No private institutions have exerted so profound an influence on national life over the centuries as the universities of Oxford and Cambridge Few universities in the world have matched their intellectual distinction and none has evolved and maintained over so long a period a strictly comparable collegiate structure Now a completely new and full scale History of the University of Oxford from its obscure origins in the twelfth century until the late twentieth century has been produced by the university with the active support of its constituent colleges Drawing on extensive original research as well as on the centuries old tradition of the study of the rich source material the History is altogether comprehensive appearing in eight chronologically arranged volumes Together the volumes constitute a coherent overall study yet each has a unity of its own under individual editorship and brings together the work of leading scholars in the history of every university discipline and of its social institutional economic and political development as well as its impact on national and international life The result is a history not only more authoritative than any previously produced for

Oxford but more ambitious than any undertaken for any other European university and certain to endure for many generations to come

*Spatial Transparency in Architecture* Camilo Rosales, 2022-08-12 This volume explores the concept of spatial transparency a form of spatial continuity that articulates depth through permeable layered or porous three dimensional organizations where interstitial light is present Although transparency is a concept largely associated with the modern movement the use of glazed components and twentieth century architectural discourse spatial transparency is a form of depth awareness through intermediate domains takes place through the interstitial fabric of a structure and occurs when several consecutive domains are spatially and visually connected These immersive environments invite active participation not as one way communication but as a series of visual and experiential exchanges interdependencies and relationships Divided into four parts the book examines spatial transparency in massive opaque constructions light constructions glass assemblies and hybrid systems It analyzes both the phenomenon of visual connectivity and continuity through intermediate spaces and spatial transparency s capacity for promoting and enabling graded interflowing environmental transactions Using historical and contemporary examples it catalogs some of the most common and recurring configurations that manifest these characteristics Over 20 international case studies from the Americas to Japan are presented to argue that environments exist in porous mediums and that by studying the openings voids light and materials of layered and or permeable organizations important insights about space making can be revealed Written for students and academics this book explores various expressions of spatial transparency in architecture and helps connect their abstract ideas with significant built works analytical drawings and comparison charts
