The Arms Trade:

The International Arms Trade Rachel Stohl, Suzette Grillot, 2009-11-09 This book explores the complexities and realities of the global conventional weapons trade It traces the history of the arms trade and examines how it has evolved since the end of the Cold War In particular the role of the largest arms exporters and importers and the business of selling conventional arms around the world are assessed and new light is shed on the illicit arms trade and the shadowy dealers who profit from their deadly commerce The book also looks closely at the devastating effect the business can have on countries societies and individuals and concludes with an evaluation of the various existing control strategies and the potential for future control opportunities Book Jacket

The Arms Trade Treaty: A Commentary Andrew Clapham, Stuart Casey-Maslen, Gilles Giacca, Sarah Parker, 2016-07-28 The United Nations Arms Trade Treaty became binding international law in late 2014 and although the text of the treaty is a relatively concise framework for assessing whether to authorize or deny proposed conventional weapons transfers by States Parties there exists controversy as to the meaning of certain key provisions Furthermore the treaty requires a national regulatory body to authorize proposed transfers of conventional weapons covered by the treaty but does not detail how such a body should be established and how it should effectively function The Arms Trade Treaty A Commentary explains in detail each of the treaty provisions the parameters for prohibitions or the denial of transfers international cooperation and assistance and implementation obligations and mechanisms As states ratify and implement the Treaty over the next few years the commentary provides invaluable guidance to government officials commentators and scholars on the meaning of its contentious provisions This volume describes in detail which weapons are covered by the treaty and explains the different forms of transfer that the Arms Trade Treaty regulates It covers international human rights trade disarmament humanitarian law criminal law and state to state use of force as well as the application of the treaty to non state actors

The No-nonsense Guide to the Arms Trade Nicholas Gilby, 2009 The only up to date work on the global arms trade this book puts the global trade in weapons into the context of history It includes recent controversial deals as well as case studies on Zimbabwe Iraq and Darfur Veteran human rights campaigner Nicolas Gilby exposes the cynicism bribery and secret deals which characterise this dirty albeit legal business

The No-nonsense Guide to the Arms Trade Gideon Burrows, 2002 The ending of the Cold War was supposed to increase global security and divert expenditure previously earmarked for arms purchases to more constructive ends Instead the arms trade has flourished Not only conventional arms but also police and surveillance equipment have been provided by Western countries seeking to make a profit from conflict in unstable parts of the world Foreign debt has remained high development has been held back and human rights have been systematically abused all with the connivance of an arms trade prepared to turn a blind eye to the uses to which increasingly sophisticated weaponry is put so long as hefty profits can be reaped This disturbing book names the players in the arms trade and charts the impact that it has had on war human rights and

development The financial and trade mechanisms that permit the arms trade to continue are revealed amid sordid tales of bribery and corruption Gideon Burrows concludes his examination by reviewing the ways in which this trade can be controlled or even abolished *The Arms Trade* Noël Merino, 2009 The Current Controversies series examines today's most important social and political issues Each volume presents a diverse selection of primary sources representing all sides of the debate in question These are excellent resources for research or debate that will rouse students interested in contemporary and controversial topics Booklist Book jacket

The International Arms Trade Edward J. Laurance, 1992 The events of 1991 in the Persian Gulf which saw Iraq import enough armaments to defy the major powers have brought the questions of arms trading to the head of the international agenda In this text international relations theory is applied to the transfer of military capability for the purpose of fortifying the national security of sovereign states The author examines past patterns of arms transfer and the influences of international factors on policymakers International relations theory is applied to the transfer of military capability for the purpose of fortifying the national security of sovereign states The author examines past patterns of arms transfer and the influences of international factors on policymakers in order to show that the arms trade has gone far beyond the control of individual nation states

The Small Arms Trade Matthew Schroeder, Dan Smith, Rachel Stohl, 2012-12-01 Small Arms are responsible for over half a million deaths each year Despite this terrifying statistic millions of guns flow into the streets of the world each year It is a multi billion dollar industry and one which is barely regulated From AK 47s to M16 rifles from Terrorist owned shoulder fired missiles to child soldiers this enlightening guide reveals the disturbing reality behind the murky underworld of international arms trading Explaining how deals can often operate on the edge of legality and listing the world's main players it goes on to ask how the exchange of small arms can be tightened in the future Full of insight and anticipating the danger of ever lighter and more powerful weapons this is required reading for anyone who wishes to understand the world today and one of the key threats to development prosperity and international peace

Law and the Arms Trade Laurence Lustgarten, 2020-09-03 This ground breaking book offers an extensive legal analysis grounded in public EU and international law of arms trade regulation integrated with insights drawn from international relations The sale of weapons and related technologies is globally one of the most politically controversial and ethically contentious forms of commerce Intimately connected with sustaining repressive governments and violations of international human rights and humanitarian law arms exports are also a central element in the economic and strategic policies of the governments of all large industrial states They have also been the source of abundant corruption and of serious challenges to the norms and effectiveness of constitutional accountability in democratic states On paper the arms trade is heavily regulated national legislation and international treaties are in place which purport to prohibit certain transactions and limit others Yet despite its importance legal and international relations scholarship on the subject has been surprisingly limited This book fills this gap in the literature by examining and comparing the export control regimes of eight

leading nations USA Russia the UK France Germany Sweden China and India with chapters contributed by leading experts in the field of law and international relations *The Arms Trade* Robert E. Harkavy, Stephanie G. Neuman, 1994 The contributions presented here will we hope provide a panoramic perspective on most of the important aspects of arms transfers Some such as those on supplier markets or on arms control represent the latest thinking and information on subjects that have long been the focus of attention in the arms trade literature Others such as the contributions on financing and intelligence represent initial attempts at opening up new areas of inquiry Preface *Taking Aim at the Arms Trade* Doctor Anna Stavrianakis, 2013-07-18 Taking Aim at The Arms Trade NGOs Global Civil Society and the World Military Order takes a critical look at the ways in which NGOs portray the arms trade as a problem of international politics and the strategies they use to effect change NGOs have been pivotal in bringing the suffering caused by the arms trade to public attention documenting its negative impact on human rights conflict security and development around the world and pushing for measures to control or eradicate the trade Overall however their activity has helped sideline debate on Northern military predominance while facilitating intervention in the South based on liberal understandings of the arms trade conflict development and human rights They thus contribute to the perpetuation of a hierarchical world military order and the construction of the South as a site of Northern benevolence and intervention Stavrianakis exposes the tensions inherent in NGOs engagement with the arms trade and argues for a re examination of dominant assumptions about NGOs as global civil society actors Beyond Viktor Bout: Why the United States needs an Arms Trade Treaty Colby Goodman, 2011 While the high profile trial of Viktor Bout in New York will show some of the threats the world continues to face from unscrupulous private arms brokers it only provides a glimpse into a much larger problem Skilled at operating in the shadows and exploiting weak national arms transfer controls arms brokers have funneled arms to almost every country under a UN arms embargoes in the last 15 years often fueling armed conflict and serious human rights violations The US has worked on at least 70 US prosecutions in the last five years that have charged defendants with crimes related to illegal arms brokering Yet it continues to face difficulties in bringing arms brokers to justice and shutting down criminal networks The lack of effective legal systems addressing the arms trade in many countries enables illicit arms dealers to exploit regulatory gaps and carry out their activities with impunity The US and the world need an effective global Arms Trade Treaty to help close these gaps and stop the irresponsible trade in deadly weapons The Arms Trade and International Law Zeray Yihdego, 2007-11-16 Shortlisted for the 2008 Young Authors Inner Temple Book Prize There are believed to be about 700 million small arms and light weapons SALW in the world often contributing to highly destabilising security and other concerns in international law SALW are the primary source of violations and abuses of humanitarian and human rights principles by states rebels terrorists and criminals Many consider them the real weapons of mass destruction of our time causing about half a million deaths annually The unrestricted international transfer of SALW by states 99 states and 1000 companies involved in manufacturing and

supply is one of the major contributory and aggravating factors of this crisis another is the illicit traffic in small arms This book deals with the proliferation of SALW and their unregulated trade and transfer across borders It addresses questions of definition manufacturing trade transfer and issues relating to state responsibility The primary focus is on conventional small arms in particular military style weapons The book tackles the core and most divisive legal problem of whether or not the laws relating to arms control and relevant norms of international law provide substantive restrictions upon the transfer of small arms by states The application of the norms of international peace and security non intervention humanitarian and human rights laws and evolved relevant customary rules of arms control relating to these norms are considered particularly carefully Questions of application and enforcement of relevant rules and institutional responses to the problem are also examined The UN began considering an arms trade treaty in 2006 the publication of the book at this critical moment in time will make a positive contribution towards shaping the debate and aims to further enhance understanding in an area where close analysis is required
