A leading consultant speaker and strategist examines the parallels between business and golf and explains how the same learning techniques can dramatically improve your skills in both **AB Bookman's Weekly** ,1994 **On the Sweet Spot** Richard Keefe,2007-11-01 Like most moments of spiritual revelation this one took place on a landfill in New Jersey A young man is standing at an unprepossessing driving range hitting balls toward a distant fence when something unusual takes place As he begins his swing he has the sensation that his club is drawing itself back on its own when it is ready it starts downward makes perfect contact and the ball soars off in the right to left arc he d imagined hitting the exact fencepost he d been aiming at from 250 yards away He steps back and wonders if he can do it again He feels like an observer as the swing begins itself and resolves itself after perfect contact with the waiting ball which again smacks against the distant post He has for however brief a time entered the zone Everyone who plays a sport knows that fleeting ineffable sensation of everything falling into place The pitched baseball looks as big as a grapefruit the basket looks as wide as a trash can the players around you are moving in slow motion But as Richard Keefe the director of the sport psychology program at Duke University looked deeper into the nature of his experience he found profound links to the spirit the brain perhaps even the soul Keefe recognized that the feeling golfers and other athletes have of being in the zone is basically the same as a meditative state And as a researcher with experience in brain chemistry he went one step further If we can figure out what s happening in the brain at such times he reasons we can learn how to get into that zone instead of just waiting for it to happen This is the Holy Grail of sport psychology teaching the mind to get out of the way so the body can do the things it s capable of doing Keefe calls it the effortless present when the body is acting of its own accord while the brain has little to do but watch All religions describe some kind of heightened awareness in their disciplines Keefe explores whether such mystical experience is a fundamental aspect of our evolution an integral part of what makes us human and keeps us from despair And he brings the discussion back to the applications of such knowledge reflecting on our ability to use these alternate planes to achieve better relationships better lives better moments Keefe s true subject is extraordinary experience being in the zone in the realm of effortless action On the Sweet Spot builds from the physical and neurological to the mystical and philosophical then adds a crucial layer of the practical how we can capture or recapture these wondrous states It is a work in the proud tradition of The Sweet Spot in Time Flow The Psychology of Optimal Experience and How the Mind Works
