Understanding Environmental Policy Convergence

Helge Jörgens,Andrea Lenschow,Duncan Liefferink,2014-01-09 Over recent decades national environmental policies have become increasingly alike This book analyses the driving forces of this process of policy convergence providing an in depth empirical analysis of the international forces at work It does so by investigating how four countries France Hungary Mexico and the Netherlands have shaped their domestic environmental policies in the context of international institutions and relationships while taking into account various domestic factors and national conditions Employing a qualitative approach the authors seek to deepen understanding of the processes and mechanisms through which international forces such as legal harmonisation institutionalised information flows and global trade dynamics affect domestic environmental policy change Together with its companion volume Environmental Policy Convergence in Europe The Impact of Trade and International Institutions 2008 this book provides a showcase of mixed methodologies combining quantitative and qualitative approaches in an innovative way

Life Phases, Mobility and Consumption

Helene Brembeck,Niklas Hansson,Jean-Sébastien Vayre,2016-03-09 The very routines of our daily life are to a great extent the expression of our vulnerability and dependence on incredibly wide and complex networks and socio technical systems Following people s routes in the city makes visible the differentially distributed capacities and potentials for mobility In today s consumer society shopping is the kind of mundane and routine mobility that we all engage in Yet having a first child or growing old radically changes people s logistical habits as consumers what the authors of this book call consumer logistics moving from home to the store and back home again with recent purchases Depending on the ages and number of children in the family and the condition of one s body physical health and strength going shopping requires quite different settings and gear Exploring consumer mobility through the lens of life phase and age will deepen the understanding of hitherto under researched aspects of the ageing process and of mobility

knowledge that is of vital importance for societies striving for sustainable mobility and sustainable cities **Moving People** Peter Cox, 2013-07-04 The local and global environmental impacts of transport are more apparent than ever before Moving People provides an attention grabbing introduction to the problems of transport and the development of sustainable alternatives focusing on the often misunderstood issue of personal mobility as opposed to freight Re assessing the value and importance of non motorized transport the author raises questions about mobility in the face of climate change and energy security particularly for the developing world Featuring original case studies from across the globe this book is essential for anyone studying or working in the area of environmental sustainability and transport policy *Development In Modern Africa* Martin S. Shanguhya, Toyin Falola, 2019-10-08 Development in Modern Africa Past and Present Perspectives contributes to our understanding of Africa s experiences with the development process It does so by adopting a historical and contemporary analysis of this experience The book is set within the context of critiques on development in Africa that have yielded two general categories of analysis skepticism and pessimism While not overlooking the shortcomings of development the themes in the book express an optimistic view of Africa s development experiences highlighting elements that can be tapped into to enhance the condition of African populations and their states By using case studies from precolonial colonial and postcolonial Africa contributors to the volume demonstrate that human instincts to improve material social and spiritual words are universal They are not limited to the Western world which the term and process of development are typically associated with Before and after contact with the West Africans have actively created institutions and values that they have actively employed to improve individual and community lives This innovative spirit has motivated Africans to integrate or experiment with new values and structures challenges and solutions to human welfare that resulted from contact with colonialism and the postcolonial global community The book will be of interest to academics in the fields of history African studies and regional studies **Globalization and Health** Ichirō Kawachi, Sarah P. Wamala, 2007 Globalization is breaking down economic political cultural demographic and social barriers across the world at an astonishing pace The topic of globalization can arouse passionate debate in many circles including academic journals the popular media and even on the streets This new world order is marked by new actors new rules of governance new forms of communication and the global movement of populations Health is an exquisitely sensitive mirror of social conditions and the authors of this book argue that the assessment of health is an important criterion for evaluating and monitoring the progress of globalization This book provides an analysis of the most serious global threats to health the tools that can be used to evaluate them and the international agencies established to respond to them Medical threats such as infectious diseases obesity tobacco use and global climate change are discussed but the authors also expand their scope to include socio political health impacts such as economic inequality The complex role of organizations such as the World Health Organization the International Monetary Fund and the World Bank is also analyzed as is the increasing interconnectedness of health and non health actors Is this

blurring of boundaries really beneficial to the public's health or have these actors abandoned health issues for power politics. By drawing together an international group of health experts, *Globalization and Health* provides a comprehensive account of the successes and failures as well as the challenges and opportunities of globalization for public health. **World Report on Road Traffic Injury Prevention** M. M. Peden, World Health Organization, 2004-03-23 Every day thousands of people are killed and injured on roads around the world with the costs of this growing but largely preventable public health concern disproportionately affecting vulnerable social groups and developing countries. In order to address these issues the World Health Organization and the World Bank have produced this joint report on road traffic injury prevention based on the collaborative contributions of experts and institutions from all continents and different sectors including transport engineering, health, police, education and civil society. It presents a comprehensive overview of the magnitude, risk factors and impact of road traffic injuries and about ways to prevent and lessen the impact of road crashes. Encyclopedia of International Development Tim Forsyth, 2018-10-24 International development is now a major global activity and the focus of the rapidly growing academic discipline of development studies. The Encyclopedia of International Development provides definitions and discussions of the key concepts, controversies and actors associated with international development for a readership of development workers, teachers and students. With 600 entries ranging in length from shorter factual studies to more in-depth essays, a comprehensive system of cross references and a full index, it is the most definitive guide to international development yet published. Development is more than a simple increase in a country's wealth and living conditions. It also implies increasing people's choices and freedoms; it is change that is inclusive and empowering. Development theory and practice has important applications to questions of economic growth, trade, governance, education, healthcare, gender rights and environmental protection and it involves issues such as international aid, peacekeeping, famine relief and strategies against HIV/AIDS. The Encyclopedia treats these topics and many more and provides critical analyses of important actors within development such as the United Nations and World Bank, non-governmental organizations and corporations. Contributors to this volume reflect the multidisciplinary and international nature of the subject. They come from social science disciplines such as economics, international studies, political science and anthropology and from specialities such as medicine. This Encyclopedia provides crucial information for universities, students and professional organizations involved with international development and those interested in related topics such as international studies or other studies of social and economic change today.
