Summary

Background City-led interventions are increasingly advocated to achieve the UN's Sustainable Development Goal to reduce violence for all. We used a new quantitative evaluation method to examine whether a flagship programme, called the "Pelotas Pact for Peace" (the Pacto), has been effective in reducing violence and crime in the city of Pelotas, Brazil.

Methods We used synthetic control methodology to assess the effects of the Pacto from August 2017 to December 2021, and separately before and during the COVID-19 pandemic. Outcomes included monthly rates of homicide and property crime, and yearly rates of assault against women and school drop-out. We constructed synthetic controls (counterfactuals) based on weighted averages from a donor pool of municipalities in Rio Grande do Sul. Weights were identified using pre-intervention outcome trends and confounders (sociodemographics, economics, education, health and development, and drug trafficking).

Findings The Pacto led to an overall 9% reduction in homicide and 7% reduction in robbery in Pelotas. These effects were not uniform across the full post-intervention period as clear effects were only seen during the pandemic period. A 38% reduction in homicide was also specifically associated with the criminal justice strategy of Focused Deterrence. No significant effects were found for non-violent property crimes, violence against women, and school dropout, irrespective of the post-intervention period.

Interpretation City-level interventions that combine public health and criminal justice approaches could be effective in tackling violence in Brazil. Continued monitoring and evaluation efforts are increasingly needed as cities are proposed as key opportunities for reducing violence for all.

Introduction

Violence and crime have been steadily rising in Brazil since the 1980s, usurping the death toll caused by infectious diseases.^{1–4} Violence is now the leading cause of death among people aged 15–49 years old, and in 2019 more than 65,900 people lost their lives to interpersonal violence—representing the highest number of violent deaths globally.⁵ Brazil thus faces, and presents, a major challenge in

achieving the United Nations Sustainable Development Goal (SDG) 16.1 to reduce violence for all by 2030.⁶

Growing evidence points to public health and criminal justice approaches to achieve violence reduction.^{7–12} Public health approaches, such as *Cure Violence*, benefit from the inclusion of stakeholders, community buy-in, and addressing multiple causes of violence in primary prevention.^{13–15} Criminal justice approaches, such as hot

Peace Processes John D. Brewer, 2013-04-25 Peace processes are mostly very fragile This engagingly written book takes a bold new approach to the topic by beginning from the premise that sociology can identify those factors that help to stabilize them The book draws a distinction between the political and social dimensions of peace processes arguing that each is dependent on the other Consideration of the social peace process neglected in conventional treatments of the subject is made central to this volume While complementing current approaches that emphasize institutional reform in politics law and economics it pays due attention to sociological

Comparative Peace Processes Jonathan Tonge, 2014-06-05 Choice Outstanding Academic Title for 2015 The term peace process is now widely used to describe attempts to manage and resolve conflict As the nature of conflict has changed so the range of available tools for producing peace has grown Alongside a plethora of political actions there is now a greater international awareness of how peace can be brokered and policed As a result peace processes now extend well beyond the actuality of ceasefires and an absence of war to cover legacy issues of victims truth and reconciliation This book expertly examines the practical application of solutions to conflict The first part analyses various political means of conflict management including consociational power sharing partition federalism and devolution The second explores the extent to which these political formulas have been applied or ignored in a wide range of conflicts including Bosnia Herzegovina Northern Ireland Israel Palestine Lebanon the Basque Region and Sri Lanka Comparative Peace Processes combines optimism with a realist approach to conflict management acknowledging that the propensity of dominant states to engage in political experimentation is conditioned by the state of conflict It will be a valuable resource for anyone interested in general theories of political possibilities in peace processes and the practical deployment of political ideas in conflict zones
