Ulrich Göringer, 2008-01-12 Editing a book on editing has a certain tongue in cheek connotation to it and I must admit that I was not aware what the job truly entailed when the project started However over the many months that it took to complete the book it was interesting to realize that indeed printing type editing and biological editing have many matching characteristics Therefore the quote by the well known lm editor Verna Fields 1918 1982 I wish the word editing had never been invented editing implies correcting and it s not can function as a motto for the book the various biological phenomena that are controlled by the different editing reactions are by far more complex than a simple correction process and it is astounding how multifaceted the eld has become All chapters of the book focus as a general editorial subtext on the corre tion between RNA structure and function and on complexity This involves diff ent length scales from complex molecular machineries to the interplay of complex biochemical pathways and to evolutionary processes The chapters are organized in a sequence beginning with a status quo account of RNA editing reactions from the focused perspective of RNA structure This is followed by a chapter on the structure function correlation in tRNA editing and a chapter on RNA editing by adenosine deaminases that act on RNA ADARs XML and FrameMaker Kay Ethier, 2008-01-01 This book is designed to teach anyone working in data intensive publishing how XML can be leveraged to make the job of presenting data easier While the XML discussions within the book are general FrameMaker is used for all of the examples since it supports a wide variety of XML import and export options In addition author Kay Ethier shows you how FrameMaker s powerful formatting features lend themselves to publishing XML documents without reworking them This book is written for a professional audience including writers database administrators developers and production staff
