Lifelong Learning Catalog, Career Development and Training Schedule Fiscal Year 2002 ,2002 **IT Success!** Michael Gentle,2007-10-29 Fifty years after the birth of corporate computing IT today is still characterized by 50 70% project failure rates Which is pretty scary when you come to think of it either a goblin has cast a spell on a whole profession or that profession is doing something fundamentally wrong IT Success challenges the widespread assumption that an IT department is like a building contractor whose project managers architects and engineers all construction industry terms are supposed to deliver systems on schedule within budget and to spec Michael Gentle explains why this is not possible and turns conventional wisdom on its head by showing that you cannot define an IT project in terms of contractual budgets and schedules anything can change during the life of a project what is eventually delivered can never be what is actually needed He proposes a new model for IT in which the traditional client vendor relationship with its contractual commitments is replaced by a shared risk reward partnership geared towards workable results over time Using real world examples and a

case study the author walks you through the end to end processes of an IT department covering subjects like demand management investment planning agile development and managing production applications

Changing by Design Deone Zell, 2018-05-31 How do corporations achieve change In the first analytic book about Hewlett Packard Deone Zell also offers an ethnography of corporate redesign documenting Hewlett Packard s radical reorganization of both a manufacturing and a research division Because she writes from within the process as it unfolds Zell is able to demonstrate how the inclusion of employees in every step of redesign can inspire the knowledge and commitment to transform an organization Hewlett Packard is among a growing number of companies in the United States exploring what is called sociotechnical systems STS redesign As competitive pressures have grown interest in STS has increased because it has the potential to catalyze comprehensive

organizational change and avoid the pitfalls of a piecemeal or small scale approach STS works from the ground up involving front line employees in analysis and redesign of the entire organization and in explicit examination of an organization's culture In Hewlett Packard's California Personal Computer Division production operators worked alongside managers to redesign their printed circuit assembly line into self managing teams of employees In the Santa Clara Division a very different workforce of engineers initially unwilling to standardize their creativity had to develop commercial applications and become more responsive to customers in order to survive On the basis of Hewlett Packard's success Zell concludes that with top level support and a high investment of resources at the outset redesign can inspire relatively rapid change especially suitable for organizations in fast paced environments As one H P manager commented Empowerment is no longer a nice thing to do It is now a business imperative
