From Blood Diamonds to the Kimberley Process Franziska Bieri, 2016-04-15 In the late 1990s several non governmental organizations NGOs focused world attention on the issue of conflict diamonds which funded wars massive death and refugee crises across Central and West Africa Several governments NGOs and key industry players engaged in negotiations under the so called Kimberley Process KP A voluntary global agreement came into effect leading to a substantial decline in illicit diamond trade Despite its importance in international affairs the KP remains understudied in academia Franziska Bieri's book provides the first comprehensive account of the KP and is the first to reveal how NGOs have become critical actors in their own right possessing the ability to directly influence policies and to participate in the decision making and the implementation of global agreements In developing this argument Bieri explains why the NGO campaign to raise awareness was successful why a rapid and comprehensive resolution on such a complex global problem was possible how the tripartite negotiations between states NGOs and industry developed during the implementation of the agreement which is an on going process Based on extensive personal interviews with prominent campaigners leading bureaucrats and industry officials hundreds of KP publications official UN documents industry news and NGO reports this timely book allows for a much needed engagement in contemporary debates about the campaign against conflict diamonds the Kimberley Process and the themes defining today's global governance arena

Natural Resource Conflicts M. Troy Burnett, 2016-09-19 Natural resource and environmental conflicts have long been issues confronting human societies This case based examination of a wide range of natural resource disputes exposes readers to many contemporary examples that offer reasons for both hope and concern The Rwandan genocide the Sudanese civil war

and perpetual instability in the Middle East and Africa each of these crises have arguably been instigated and maintained by natural resource disputes China has undertaken a Herculean task to plant hundreds of millions of trees along its margins in an effort to save Beijing from crippling dust storms and halt the expansion of the Gobi desert Will it work and is it worth it These and many other cases of conflict stemming from natural resource or environmental concerns are explained and debated in this up to date examination of contemporary and ongoing topics The book examines conflicts over precious resources and minerals such as diamonds oil water and fisheries as well as the pursuit of lesser known minerals like Coltan and other rare earth elements important resources in our technological age in remote locations such as Greenland and the Congo Each topic contains an overview and two position essays from different authors thereby providing the reader with highly informative and balanced perspectives Reference entries accompany each topic as well helping students to better understand each issue As the world hurtles into the 21st century these natural resource issues are becoming increasingly important with all global citizens having a significant stake in how these conflicts arise and play out

Resource Curse or Cure ? Martin Brueckner,Angela Durey,Robyn Mayes,Christof Pforr,2014-04-02 Globalisation and rapid social and environmental change in recent decades have brought into sharper focus not only the benefits but also the costs of economic development The once assumed link between economic development and societal well being is being increasingly questioned in the face of growing social and environmental problems and unfulfilled

expectations concerning political and commercial decision makers The orthodox development dogma is being tested in particular in resource based economies such as Western Australia where globalisation pressures and the concomitant rise in the demand for natural resources highlight the difficulties of effectively balancing broader societal interests with those of industry and the state This book provides a critical review of the socio political environmental and cultural state of play in Western Australia offering an analysis of how resource based developments are shaping the state and its people
