Constructing Inequality in Multilingual Classrooms Luisa Martín Rojo,2010-07-30 In her groundbreaking and innovative study the author takes us on

a fascinating journey through some of Madrid's multilingual and multicultural schools and reveals the role played by linguistic practices in the construction of inequality through such processes as what she calls de capitalization and ethnicization Through a critical sociolinguistic and discourse analysis of the data collected in an ethnographic study the book shows the exclusion caused by monolingualizing tendencies and ideologies of deficit in education and society The book opens a timely discussion of the management of diversity in multilingual and multicultural classrooms both for countries with a long tradition of migration flows and for those where the phenomenon is relatively new as is the case in Spain This study of linguistic practices in the classroom makes clear the need to rethink some key linguistic concepts such as practice competence discourse and language and to integrate different approaches in qualitative research The volume is essential reading for students and researchers working in sociolinguistics education and related areas as well as for all teachers and social workers who deal with the increasing heterogeneity of our late modern societies in their work

reality or the facts of life are very different depending on the kind of life you can afford This goes for language as well and it explains both the title of this book and gives it its raison d'être It deals with power in language and asks Who is really in command when we use our language And why does it make sense to talk about a language of power or lack of it The powerful are the colonizers the colonized are the powerless in language as in geopolitics Colonizers and colonized alike however are subject to the social and economic conditions prevailing in society and therefore a thorough analysis of these conditions is a must for any socially oriented theory of language use

Lesbian Discourses Veronika Koller, 2008-02-19 Lesbian Discourses is the first book length treatment of

lesbian text and discourse It looks at what changing images of community American and British lesbian authors have communicated since 1970 how this change can be traced in texts such as pamphlets magazines and blogs and why this change has taken place At the heart of the book is a detailed linguistic analysis which is embedded in a discussion of the relevant socio political contexts and discourse practices and supplemented by interview data The book can more generally be read as an example of how to do textual analysis in social research in particular how to engage in the discourse historical and socio cognitive study of collective identity Despite its text centered approach the book avoids being overly technical and will therefore be of interest not only to postgraduate students and researchers in linguistics but also to those in anthropology history and sociology especially women s gender studies

Methods of Text and Discourse Analysis Stefan Titscher, Bryan Jenner, 2000-07-28 This volume is the most comprehensive overview to date of sociologically orientated approaches to text and discourse analysis and is worth reading even for those who are interested only in purely linguistic approaches to text and discourse Its main merit I think is that it introduces approaches which up to now have hardly been admitted into the universe of scientific discourse Discourse Studies *Methods of Text and Discourse Analysis* provides the most comprehensive overview currently available of linguistic and sociological approaches to text and discourse analysis Among the 10 linguistic and sociological models surveyed in this book some of the more important are Grounded Theory Content Analysis Conversation Analysis and Critical Discourse Analysis The book presents each approach according to a standardised format which allows for direct systematic comparisons The fully annotated lists of sources provide readers with an additional means of evaluation of the competing analytical methods Interdisciplinary and international in its aims *Methods of Text and Discourse Analysis* suggests the benefits both linguists and sociologists will derive from a more intimate knowledge of each others methods and procedures
