Koerner, Hans-Josef Niederehe, Kees Versteegh, 2008-07-14 No detailed description available for HIST LANGUAGE SCIENCES KOERNER 1 TLBD HSK 18 1 E BOOK **The Language System of English** Vulf Plotkin, 2006 A description of the English language as a dynamic system in the evolutionary process of radical typological restructuring which has deeply affected its constituent subsystems grammatical lexical and phonic *The Language Web* Jean Aitchison, 1997 Language is like a vast spider's web In this volume Jean Aitchison explores the different facets of this web She begins with the cobweb of false worries which surrounds language She then discusses how language evolved in the human species how children acquire it and how educated English speakers remember 50 000 or more words Finally she argues that people are right to be concerned about language though not in the ways traditionally assumed This is the text of the 1996 BBC Reith lectures slightly revised for publication with illustrations and full references and an afterword which looks at the reception of the lectures The Language of Outsourced Call Centers Eric Friginal, 2009 The Language of Outsourced Call Centers is the first book to explore a large scale corpus representing the typical kinds of interactions and communicative tasks in outsourced call centers located in the Philippines and serving American customers The specific goals of this book are to conduct a corpus based register comparison between outsourced call center interactions face to face American conversations and spontaneous telephone exchanges and to study the dynamics of cross cultural communication between Filipino call center agents and American callers as well as other demographic groups of participants in outsourced call center transactions e.g. gender of speakers agents experience and performance and types of transactional tasks The research design relies on a number of analytical approaches including corpus linguistics and discourse analysis and combines quantitative and qualitative examination of linguistic data in the investigation of the frequency distribution and functional characteristics of a range of lexico syntactic features of outsourced call center discourse **The Languages of Africa and the Diaspora** Jo Anne Kleifgen, George C. Bond, 2009 This book takes a fresh look at subordinated vernacular languages in the context of African Caribbean and US educational landscapes highlighting the social cost of linguistic exceptionalism for speakers of these languages Chapters describe contravening movements toward various forms of linguistic diversity and offer a comprehensive approach to language awareness in educative settings **The Language of Robert Burns** Alex Broadhead, 2013-11-22 This monograph offers a radical reconceptualization of the relationship between the poetics and practice of Robert Burns and reevaluates the nature of his role in the history of Scots By drawing on ideas from twenty first century sociolinguistic theory it seeks to transform the debate surrounding Burns's language Through a series of readings that explore the way in which Burns used and commented on the styles associated with different places groups and genres it demonstrates how languages places and the identities associated with both are in Burns's writing subject to continual

reinvention In this respect the study breaks with existing accounts of the subject insofar as it presents Scots English and the other languages used by Burns not as fixed empirically observable entities but as ideas that were revised and remade through the poet's work Focusing on Burns's poems songs letters prefaces and glossaries the book pays special attention to the complex ways in which the author engaged with such issues as phonology grammar and the naming of languages The Burns who emerges from this book is not the marginal figure of traditional accounts an under educated poet alienated from the philological mainstream but rather a well informed thinker who more than any other contemporary writer embodies the creative linguistic spirit of the eighteenth century *The German Language in a Changing Europe* Michael G.

Clyne,1995-11-16 Recent sociopolitical events have profoundly changed the status and functions of German and influenced its usage In this study published by Cambridge in 1984 Michael Clyne revises and expands his original analysis of the German language in *Language and Society in the German speaking Countries* in the light of such changes as the end of the Cold War German unification the redrawing of the map of Europe increasing European integration and the changing self images of Austria Switzerland and Luxembourg His discussion includes the differences in the form function and status of the various national varieties of German the relation between standard and non standard varieties gender generational and political variation Anglo American influence on German and the convergence of east and west The result is a wide ranging exploration of language and society in the German speaking countries all of which have problems or dilemmas concerning nationhood or ethnicity which are language related and or language marked **A Grammar of the Language of Burmah**
