Grades 11-13 The Learning and Study Skills Program Level III was designed to provide an introduction to learning and study skills for high school juniors and seniors and beginning college students through a series of activity oriented units. It is structured on the assumption that an activity oriented lesson is the most effective instructional strategy for the teaching of study skills more succinctly than learning by doing is the best way. Study smart. Learning and study skills are important for learning. They are methods and ways of doing things that help make learning easier. Understanding how to study can also facilitate learning by assisting students as they complete assignments correctly and efficiently during a specified period of time. Just like any other skill, knowing how to learn and study proficiently must be learned and practiced over time. The Program has been designed to help students learn more efficiently and effectively. Learning and Teaching Donald P. Kauchak, Paul D. Eggen, 1993. This substantially revised Fourth Edition represents one of the most up to date research based methods texts available today. This text has two specific goals: to change how teachers think about teaching and to change how they actually teach. Solidly grounded in research, the text describes practical methods in a clear, readable manner with numerous case examples and offers suggestions for applying those methods in today's diverse school environments. Kauchak and Eggen organize their discussion around three important themes in education: diversity, motivation, and technology.
