changing vision of the universe In this masterly synthesis Arthur Koestler cuts through the sterile distinction between
sciences and humanities to bring to life the whole history of cosmology from the Babylonians to Newton He shows how the
tragic split between science and religion arose and how in particular the modern world view replaced the medieval world
view in the scientific revolution of the seventeenth century He also provides vivid and judicious pen portraits of a string of
great scientists and makes clear the role that political bias and unconscious prejudice played in their creativity The
