Rethinking the Mathematics Curriculum Celia Hoyles, Candia Morgan, Geoffrey Woodhouse, 2002-01-04 At a time when political interest in mathematics education is at its highest this book demonstrates

that the issues are far from straightforward A wide range of international contributors address such questions as What is mathematics and what is it for What skills does mathematics education need to provide as technology advances What are the implications for teacher education What can we learn from past attempts to change the mathematics curriculum Rethinking the Mathematics Curriculum offers stimulating discussions showing much is to be learnt from the differences in culture national expectations and political restraints revealed in the book This accessible book will be of particular interest to policy makers curriculum developers educators researchers and employers as well as the general reader **Humane Economics** Jack C. High, Don Lavoie, 2006-10-27 Don Lavoie's published work encompassed a wide range of subjects socialism hermeneutics information technology and culture The subjects appear unrelated but a close examination of his research reveals an underlying unity of thought and an economics at sharp variance with the post World War II mainstream By linking economics to other disciplines Lavoie demonstrated that economics is closer to the humanities than to the physical sciences The contributors to this volume explore Don Lavoie's legacy and its implications for economics Regulatory Model for Digital Rights Management Cong Xu, 2020-02-13 This book highlights the shortcomings of the present Digital Rights Management DRM regulations in China Using literature reviews and comparative analysis from theoretical and empirical perspectives it appraises different DRM restriction regulations and practices as well as current advice on balance of interests to analyze the dilemma faced by the DRM system This research intends to help China establish a comprehensive DRM regulatory model through comparative theoretical and empirical critiques of systems in America and Europe A newly designed DRM regulatory model should be suitable for specific Chinese features and should consist of government regulated self regulated and even unregulated sections The new regulation model might be an addition to existing legal structures while self regulations social enforcement also would be as important as legislation based on case studies

Embracing the Track of Appearance: An Emotional Symphony within **Superdistribution Objects As Property On The Electronic Frontier**

In a world eaten by screens and the ceaseless chatter of immediate transmission, the melodic beauty and psychological symphony developed by the written term usually fade into the backdrop, eclipsed by the relentless sound and distractions that permeate our lives. But, located within the pages of **Superdistribution Objects As Property On The Electronic Frontier** a stunning fictional prize filled with raw thoughts, lies an immersive symphony waiting to be embraced. Constructed by an elegant musician of language, that charming masterpiece conducts viewers on a mental trip, well unraveling the concealed melodies and profound influence resonating within each carefully crafted phrase. Within the depths of the poignant examination, we shall examine the book's main harmonies, analyze their enthralling writing design, and submit ourselves to the profound resonance that echoes in the depths of readers' souls.
