majority of British adults thought that providing childcare support was an important part of the grandparent role At the same time it revealed that grandmothers involvement was very diverse and that many grandmothers who would like to be more active in caring for their grandchildren were excluded as a consequence of family breakdown While comprehensive inevitably the survey could not deal with questions about change over the last few generations The personal case studies in this volume fill that gap The generation now moving into grandparenthood was active in restructuring personal relationships when younger Several of the contributors to the book were prominent members of the women s movement in the late sixties and seventies Inevitably there are more novelists academics and activists than is representative of the general population But the volume manages to collect together a very wide range of lifestyles and views Collectively they show how far the revolution of their youth into senior family roles and how their new roles may be encouraging them to question and revise their former attitudes Geoff Dench is a senior research fellow at the Institute of Community Studies and professor of sociology at Middlesex University He is the author of *Transforming Men* and *Rewriting the Sexual Contract* both published by Transaction
