Relational Processes in Counselling and Psychotherapy

Supervision Ottar Ness, Sheila McNamee, Øyvind Kvello, 2021-06-26 This book is focused on relational processes in supervision for counselling and psychotherapy. The aim is first to introduce a relational theoretical stance, then to apply that stance to the process of supervision and finally to offer practitioners immediately accessible resources for relational supervision. Within a relational perspective, supervisor and supervisees are viewed as partners who co-construct the supervisory process. Unlike other approaches to supervision where the emphasis is on specific techniques and strategies for supervision, the relational orientation of this book invites supervisor and supervisee into different understandings of the supervisory interaction. This orientation directs our attention to the importance of co-creating the therapeutic relation alliance with special attention to the wellbeing of the supervisee and the supervisor. Supervision from this perspective is focused on what participants are making together rather than on the individual abilities, strengths and weaknesses of either the supervisor or the supervisee.

Supervision Moira Walker, Michael Jacobs, 2006-02-22 Supervision is a prerequisite for all counsellors and for most psychotherapists, yet until recently it has been assumed that any experienced counsellor or therapist could become a supervisor without any special expertise. But the experience of those in supervision is sometimes of inadequate or even unhelpful work by their supervisors. At the same time, supervision is receiving considerable attention as a discipline in its own right with an expanding literature on the dynamics of the supervisory couple or the supervisory triad since the client is a central if absent presence. More attention is also being paid to the technical skills required of the supervisor. This book addresses those issues both from the perspective of the supervisee and the supervisor, suggesting what supervisees might expect from good supervision as well as offering guidance to supervisors on how best to use to the full the opportunities offered by a therapeutic situation which has some similarities but also some radical differences from counselling and therapy itself.

Supervision in the Mental Health Professions Joyce Scaife, 2003-08-29 Draws on over two decades of experience to illustrate ways of thinking about and doing supervision. Using practical examples, she explores often encountered dilemmas.
