Supervisory Alliance Facilitating The Psychotherapists Learning Experience:

The Supervisory Alliance Susan Gill, 2001 Supervision has shifted from an authoritarian didactic model to a relational one. The interpersonal dynamics between supervisor and supervisee are now seen as central to the development of a productive learning experience. As supervisors are becoming more sensitive to their trainees' vulnerability and anxiety, new frameworks for understanding and dealing with this shift are required. This book presents current thinking on such relevant issues as creating an optimal learning environment, establishing a safe space, developing an atmosphere of reflectivity, attuning oneself to the emotional experience of the supervisee, and encouraging the disclosure of the supervisee's countertransference.

Psychotherapist Revealed Andrea Bloomgarden, Rosemary B. Mennuti, 2010-06-10 In this edited volume, the real dialogue begins. Therapists speak openly and honestly about their self-disclosure practices, decisions, and clinical dilemmas. Bloomgarden and Mennuti bring together research, training, and tales from their clinical experience to illuminate lessons derived from their own journeys toward judicious, balanced self-disclosure practices. In a readable fashion, the stories highlight a variety of self-disclosure and boundary issues that occur in the course of psychotherapy. Numerous treatment modalities and clinical orientations are represented. The collective wisdom offered through these stories, which includes suggested guidelines and a standard of care for good practice, will assist the reader in developing a better understanding of what it means to self-disclose appropriately, recognizing a flexible middle ground between too much and too little, along with responsiveness to client need. The Freudian-based taboo that rigidly warns against all self-disclosure is antiquated, and a more reasonable, balanced perspective is under way. As a psychotherapeutic community including psychologists, social workers, art therapists, counselors, dance/movement therapists, who are all represented in this book, it is time to talk openly about a balanced, judicious, and therapeutically appropriate approach to self-disclosure and boundaries. Bravely, that is exactly what the authors in this book have done.

Scharff, 2005-09-16 How do the fundamental elements of experience impact on the practice of psychotherapy Dimensions of Psychotherapy Dimensions of Experience explores the three basic elements of psychotherapy time space and number summarising theory setting it in context and bringing concepts to life with clinical illustrations Michael Stadter and David Scharff bring together contributions describing how each of these elements as well as their simple and direct manifestations in the physical world also combine to form the psychological dimensions of symbolic reality both in the inner world and in the transactional world They also reveal how in encounters between patient and therapist the combination of inner worlds form a new uniquely psychological fourth dimension that saturates the activity and experience of the other three elements This book aims to increase our understanding of the action of the three

dimensions of psychotherapy by looking at the elements that constitute the setting and process in which clinicians engage every day. The contributors, all of whom are experienced psychotherapists and psychoanalysts, connect their thinking on the dimensions to clinical practice by illustrating their ideas with case material and examining their impact on general treatment issues.
