Young Children in a Digital Age Lorraine Kaye,2016-06-23 Young children are born into a digital world and it is not unusual to see preschool children intuitively swiping screens and confidently pressing buttons There is much debate about the impact of the increased access to technology on young children's health and wellbeing with claims that it damages their social skills and emotional development This timely new textbook examines how developments in technology particularly mobile and touch screen technology have impacted on children's lives and how when used appropriately it can support all aspects of their development Clearly linking theory and research to everyday practice the book offers guidance on The role of technology in the early years curriculum Developing young children's understanding of safe and responsible use of technology The role of the adult within digital play activities Using technology to enhance and develop young children's creativity Technology and language acquisition Featuring a wide range of case studies and examples to show how the ideas described can be put into practice this is essential reading for all early years students and practitioners that want to know how they can harness

technology in a meaningful way to support young children's learning and development **Handbook of Research on Empowering Early Childhood Educators With Technology** Burris, Jade, Rosen, Dina, Karno, Donna, 2021-06-18

Computers and mobile technologies have become widely adopted as sought after tools in the field of education. The prevalence of technology in early childhood education (ECE) is increasing and teachers both pre-service and in-service are using best practices to integrate tools effectively to improve teaching and learning within the field. This includes settings such as childcare centers, family childcare, and community programs that have both educators and administrators adapting to the use of technology. Therefore, it has become critical to research and explore the best practices of technology integration and successful strategies to improve the use of technology in ECE. The *Handbook of Research on Empowering Early Childhood Educators With Technology* examines best practices that focus specifically on those that facilitate the development of competencies in teaching young children birth to age 8 and technology integration. The chapters include information on the foundations of technology in early childhood education, content-specific technology applications, developmentally appropriate practices (DAP) for learners using technology, and how to meet diverse learner needs with technology. The target audience for this book is early childhood professionals, teacher educators, pre- and in-service teachers in early childhood settings, faculty, and researchers in the field of education, instructional technologists, childcare and elementary school administrators, early education policy organizations, and advocacy groups that are interested in the best practices and successful strategies for implementing technology in ECE. The Routledge International Handbook of Learning with Technology in Early Childhood

Natalia Kucirkova, Jennifer Rowsell, Garry Falloon, 2019-03-04. The *Routledge International Handbook of Learning with Technology in Early Childhood* focuses specifically on the most cutting-edge innovative and international approaches in the study of children's use of and learning with digital technologies. This edited volume is a comprehensive survey of methods in children's technologies and contains a rich repertoire of studies from diverse fields and research, including both educational and developmental psychology, post-humanist literacy, applied linguistics, language, and phenomenology and narrative approaches. For ease of reference, the Handbook's 28 chapters are divided into four thematic sections: introduction and opening reflections; studies answering ontological questions which theorize how children take on original identities in becoming literate with technologies; studies answering epistemological questions which focus on how children's knowledge and learning are co-constructed with a diverse range of technologies; studies answering practice-related questions which explore the resources and conditions that create the most powerful learning opportunities for children. Expertly edited, this interdisciplinary and international compendium is an ideal introduction to such a diverse, multi-faceted field. Talking and Doing Science in the Early Years Sue Dale Tunnicliffe, 2013-05-29. Young children are intuitive emergent scientists; they observe, raise hypotheses, experiment, and notice patterns. Most of our everyday actions at home and in other settings, inside and outside, have a scientific basis, and it is through these early experiences that children formulate their ideas about the

world in which we live This accessible book introduces the simplest form of the principles and the big ideas of science and provides a starting point for encouraging children to have an interest and experiential understanding of basic science and engineering It shows you how you can support young children in exploring everyday phenomena and develop their scientific language skills through readily available resources and hands on experiences Each chapter focuses on a different aspect of science and includes a summary of the big ideas to refresh your own scientific knowledge numerous activities that encourage young children to observe question and carry out their own investigations a useful list of everyday resources and relevant vocabulary Providing a wealth of exciting meaningful ways to promote scientific experiences and learning this highly practical book will help you to build on children's natural curiosity about the world and develop their understanding through your everyday provision in early years settings and at home
