## **Supportive Care Of The Cancer Patient:**

Supportive Care of the Cancer Patient Peter H. Wiernik, 1983      *Supportive Care in Cancer Therapy* David S. Ettinger, 2014-03-14 In this volume *Supportive Care in Cancer Therapy* a part of the Cancer Drug Discovery and Development series the contributors provide an up to date concise review of specific consequences of cancer and its treatment The book will assist those who care for the cancer patient to better understand all of the consequences of cancer and its treatment In addition the reader will gain thoughtful information on the care of the older patient as well as the dying patient      *Cancer in Context* James Brennan, Clare Moynihan, 2004 This book offers healthcare professionals academics and anyone affected by cancer a fresh and original approach to the supportive care of people with cancer It looks at the underlying reasons why cancer so often leads to high levels of distress and more importantly it suggests many practical ways distress can be minimised and prevented The actual experiences of cancer patients as recorded in their personal diaries are combined with theory research and practical clinical advice In each of its seven chapters *Cancer in Context* takes a different perspective towards supportive care in cancer It begins by considering how people in general manage and adjust to massive changes in their lives and in particular how they react to the threat of cancer It goes on to examine the lived experience of people with cancer as they negotiate the many changes and challenges that follow their diagnosis Of course cancer doesn't only affect the person who has the disease it also impacts on families partners and carers One chapter explores these and other issues such as sexual difficulties the needs of older people single people and gay and lesbian couples Chapter 4 shows that the social and cultural context of a person's life is critical to understanding their resources the way they are treated and the responses they make to serious illness However it is in the clinical context that professionals have an opportunity to minimise disruption to their patients quality of life as they endure the notorious demands of oncology treatments The book offers practical clinical advice on psychosocial aspects of conventional cancer treatments common treatment difficulties cancer rehabilitation and palliative care Chapter 6 provides a summary of the burgeoning area of information and communication skills within healthcare and finally the book ends by considering how doctors nurses radiographers and other healthcare professionals can maintain their supportive care in light of such high levels of stress and burnout among these staff groups

Issues in Supportive Care of Cancer Patients Donald J. Higby, 2012-12-06      **Supportive Care of the Cancer Patient** J. W. Sweetenham, Christopher John Hacon Williams, 1997-08-29 Throughout this century patients with cancer have endured often harsh treatments with the hope that any adversity will have been worth the ultimate cure As the effects of the underlying tumour and its therapy can often make the patient very ill careful management is required if the harmful complications of the cancer itself and the side effects of the drugs and radiation are to be avoided *Supportive Care of the Cancer Patient* provides strategies for the optimum management of such patients The emphasis is on maximising both quality and duration of life As well as focusing on the serious and often life threatening complications resulting from cancer and its

treatment this book offers guidance on psychological support for cancer patients and their medical carers the role of cytokines and interventional radiology in the management of malignant disease Supportive Care of the Cancer Patient will prove invaluable to all those caring for cancer patients particularly those patients undergoing intensive chemotherapy

Supportive Care in Cancer Patients Hans-Jörg Senn, Agnes Glaus, Luzius Schmid, 2012-12-06 The symposium on supportive care in cancer patients which took place in St Gallen Switzerland on February 18 21 1987 welcomed renowned experts in the field and more than 600 participants from 25 countries with the aim of stimulating discussion on how to improve our professional skills and personal attitudes to ward cancer patients in all stages of their disease Why did we organize such a symposium on supportive care in cancer patients Recent decades have witnessed remarkable success in cancer treatment and we have learned how to cure a finite number of neoplastic diseases Some malignant tumors that previously entailed high fatality rates such as leukemias lymphomas and testicular cancers can now be cured even when at an advanced stage Yet it seems to many that our struggle to improve results and to fight death from cancer has also imposed greater toxicity on patients Conventional scientifically based oncology has only recently made adequate efforts to improve the subjective quality of life of cancer patients for example through prophylaxis against emesis nausea and scalp hypothermia pain control and the development of psychosocial support structures The search for less toxic and yet equally effective treatment measures has not been one of our primary goals in the past Supportive care has always been part of nurses professional aim even though many have not known how best to offer it **Everyone's Guide to Cancer Supportive Care**

Ernest Rosenbaum, Isadora Rosenbaum, 2005-09 Through more than 50 chapters cancer care specialists and nearly 80 other medical experts answer every conceivable question concerning a cancer patient's physical psychological and spiritual needs

The Cancer Patient and Supportive Care Donald J. Higby, 2012-12-06 During the course of editing Supportive Care in Cancer Therapy Martinus Nijhoff Publishers 1983 it became apparent that several topics would have to await a second volume Furthermore development of new information and evolution of ideas continues This volume continues the intent of the first to present reviews of issues relating to supportive care and to identify areas where further definition and further research is needed The physician reading this volume will find the contents thought provoking In addition to reviews authored by physicians there are chapters authored by non physicians who present a different perspective and a different style of writing Reverend Bigler writes from his long experience as a chaplain for cancer patients and tries to identify the changes that take place in the personality of the chaplain who works with dying patients Ms Kilion and Ms Powell try to describe what an Oncology Nurse is rather than what one does Attorneys Reese and Price present a very practical summation of issues which face the cancer patient and their chapter could easily be copied and offered to one's patients furthermore this chapter gives direction to the physician who is frequently called upon for advice regarding issues which lie entirely outside his/her formal training Excellent reviews on more medical subjects are here Cancer in the Elderly should

provoke oncologists to re examine their approach to the geriatric patient
