   Surface Mount Technology Ray Prasad,2013-11-27 A foreword is usually prepared by someone who knows the author or who knows enough to provide additional insight on the purpose of the work When asked to write this foreword I had no problem with what I wanted to say about the work or the author I did however wonder why people read a foreword It is probably of value to know the background of the writer of a book it is probably also of value to know the background of the individual who is commenting on the work I consider myself a good friend of the author and when I was asked to write a few words I felt honored to provide my view of Ray Prasad his expertise and the contribution that he has made to our industry This book is about the industry its technology and its struggle to learn and compete in a global market bursting with new ideas to satisfy a voracious appetite for new and innovative electronic products I had the good fortune to be there at the beginning or almost and have witnessed the growth and excitement in the opportunities and challenges afforded the electronic industries engineering and manufacturing talents In a few years my involve ment will span half a century

first time three U S standards organizations the IPC Lincolnwood IL theEIA Washington D C and theASTM Philadelphia cametogether tocreate standards before a technology was in high demand The term fine pitch technology and its acronym FPT have since become widely accepted in the electronics industry The knowledge of the terms and demands of FPT currently exceed the usage of FPT packaged components but this is changing rapidly because of the size performance and cost savings of FPT I have resisted several past invitations to write other technical texts However I feel there are important advantages and significant difficulties to be encountered with FPT   Applied Surface Mount Assembly Robert J.
