Andrew T. H. Tan, 2010-10-18 Since the crucial maritime battles that were fought during the Second World War in both the Atlantic and Pacific Oceans and the post war period which saw a naval standoff between a vast US navy and a growing Soviet navy the focus of international maritime power has changed Major maritime powers have deployed warships aircraft carriers and heavy land forces around the globe for purposes of diplomacy such as in maintaining far flung alliances for deterrent purposes such as in the Taiwan Straits for warfighting such as in its crucial support roles in recent conflicts in Afghanistan and both Gulf Wars and for complex emergencies such as tsunami and earthquake rescue in Indonesia and Pakistan Increasingly maritime power is employed in counter terrorism such as in joint patrols counter terrorism exercises and in intercepting ships suspected of carrying weapons of mass destruction The Politics of Maritime Power is an exploration of the contemporary facets of maritime power particularly as an instrument of the state in the post Second World War era This reference volume is divided into four parts with chapters exploring various aspects of modern maritime power written by maritime experts a series of maps which show major maritime zones a glossary which contains over 240 entries on various aspects of maritime power and a detailed bibliography      **Cruisers and Battle Cruisers** Eric W. Osborne, 2004-11-23 Fast cruisers the eyes of the fleet were the standard bearers of empire the ultimate warships of gunboat diplomacy no other vessel class was so well equipped to serve as both a working war machine and a projection of national might Cruisers and Battle Cruisers explores the pivotal importance of cruiser class ships to naval warfare and in a wider scope world politics In vivid

but accessible detail it describes the milestones of cruiser design and deployment from mid 19th century development of steam propelled ironclads to the World War I introduction of battle cruisers from the decisive naval engagements of World War II and the addition of missiles and computerized systems to the most recent developments Readers will see how specific technological changes progressively increased the destructive power of cruisers and altered their combat roles how design innovations altered the quality of life aboard ship and how cruisers came to be called upon to serve a variety of noncombat roles in war and peace

**Destroyers** Eric W. Osborne, 2005-06-22 On July 4 1991 the Arleigh Burke class of destroyers the most powerful surface combatants in naval history was commissioned It was the culmination of a century and a half evolution of the destroyer an evolution captured in this vivid and timely history of the world's most popular warship *Destroyers An Illustrated History of Their Impact* tells the story of one of the most recent most rapidly evolving additions to the world's navies Coverage ranges from the 1882 launch of the first destroyer through the nonstop technical and strategic innovations of the world war eras to the current high watermarks of destroyer design such as the Arleigh Burke class named for the navy's most famous destroyer squadron combat commander With its ship by ship analysis this masterful volume shows how destroyers have continually met the challenge of protecting naval and land operations from ever more dangerous attacks The book also captures the flavor of shipboard life for officers and crew and looks at the crucial role of the destroyer as a standard bearing status symbol of naval might and political intention

**Arms Control At Sea** J Richard Hill, 2024-04-01 Originally published in 1989 this book reviews the history of maritime control measures from before the First World War and provides a critical examination of both the objectives of maritime power and the concepts of disarmament peace zones parity verifiability and peaceful co existence It argues that the objectives of maritime power are not necessarily incompatible with international security and that strategic deterrence can contribute to improved security Limitation measures it is argued can in some cases be double edged endangering other security fields and having a destabilizing effect The book stresses the need for non absolute solutions in order to achieve a reasonable level of security and makes proposals for both structural and confidence building measures along those lines

**NATO Review**, 1987 **IMDC97: State of the art reports - v. 3** Pratyush Sen, Richard Birmingham, 1997 **History of Warships** James L. *Postswirl Propulsors* Benjamin Y.-H. Chen, 1992 A design method for postswirl PS propulsors is addressed The principles of momentum mass and circulation conservation are satisfied and the effects of the hub boundaries have been taken into account in the design and analysis methods A PS propulsor was designed for close to uniform flow at the operating point for a surface ship Self propulsion experimental results show that the performance predictions agree well with the measurements Subject terms Postswirl propulsors mass conservation momentum conservation circulation conservation hub effects *The Design of Merchant Ships and Cost Estimating* Alexander Kari, 1927 *B-25 Mitchell vs Japanese Destroyer* Mark Lardas, 2021-12-23 Throughout the first year of the war in the Pacific during World War II the USAAF was relatively ineffective against ships Indeed warships in particular proved to be too elusive for conventional medium level bombing High level attacks wasted bombs and torpedo attacks required extensive training But as 1942 closed the Fifth Air Force developed new weapons and new tactics that were not just effective they were deadly A maintenance officer assigned to a B 25 unit found a way to fill the bombardier's position with four 0 50 cal machine guns and strap an additional four 0 50s to the sides of the bomber firing forward Additionally skip bombing was developed This called for mast top height approaches flying the length of the target ship If the bombs missed the target they exploded in the water close enough to crush the sides The technique worked perfectly when paired with strafe B 25s Over the first two months of 1943 squadrons perfected these tactics Then in early March Japan tried to reinforce their garrison in Lae New Guinea with a 16 ship convoy eight transports guarded by eight destroyers The Fifth Air Force pounced on the convoy in the Bismarck Sea By March 5 all eight transports and four destroyers had been sunk This volume examines the mechanics of skip bombing combined with a strafing B 25

assessing the strengths and weaknesses of the combatants B 25 versus destroyer and revealing the results of the attacks and the reasons why these USAAF tactics were so successful
