**The Emergence of Leadership** Douglas Griffin,2003-09-02 The second half of the twentieth century witnessed the emergence of the most complex global organizations ever known Taking a complexity theory perspective this book explores the key factor that sustains them leadership The book examines how leadership is currently understood primarily from a systems based perspective as an attribute of the individual the leadership role being to articulate values missions and visions and then persuade others to adhere to them It argues for a new view of ethics as co created through identity and difference representing the end of business ethics as we know it today Areas considered include risk and conflict spontaneity and motivation In the past we have focused on the choices of individual leaders In today s highly complex organizations we are now coming to understand the nature of leadership as self organizing and as such closely linked to ethics This means that we can no longer understand ethics simply as centered rational choice in planning and action

**Globalization** C. Gopinath,2018 Globalization evokes mixed responses It is praised for facilitating business greater trade between nations and reducing poverty and is also accused of causing job losses and homogenizing culture While some nations cheer its benefits others think of barriers to protect themselves Yet everyone agrees that it is a multidimensional and complex process that continuously reshapes our environment Rather than wonder whether globalization is good or bad it is important to understand how it impacts nations organizations and individuals and be prepared to operate in that context
