## **Surgery In Gynecological Oncology:**

Surgery for Gynecologic Cancer Mikio Mikami, 2019-04-23 This comprehensive volume provides exhaustive interpretations of surgery for gynecologic cancer. In these chapters, expert authors expound the history, principles, and indications, preoperative evaluations, techniques, morbidity, and the future prospects for each surgical procedure. Also included are comparisons of the training systems of gynecologic surgeons in Japan and the USA. Recently, minimally invasive surgeries such as laparoscopic and robotic approaches have been introduced into the gynecologic oncology field. Readers will be interested to know the history, advances, and current status of gynecologic surgery in Japan. This collection methodically broadens understanding of new surgical methods with quality assurance aimed at saving the cancer patient's life from the point of view of gynecologic oncologists. Thus, the book benefits not only experienced gynecologists but also young physicians and all medical oncologists who are involved in gynecologic cancers. *Surgery in Gynecological Oncology* A.P.M.

Heintz, C.T., Griffiths, J.B., Trimbos, 2012-12-06 Gynecological oncology surgery has shown substantial progress in recent years. Most of the advances come from gynecologists with full-time commitments to gynecological oncology. It is important for the general obstetrician-gynecologist to be informed about the possibilities offered by modern gynecological oncology. Thus, he or she may acquire new techniques which can be used in general gynecological practice. On the other hand, it is essential to know what his or her colleagues specialized in gynecological oncology can offer in oncology centres. The chapters in this book are based on a postgraduate course organised by the Boerhaave Committee for postgraduate medical education of the medical faculty of the University of Leiden in the Netherlands. In view of the considerable interest shown by many highly qualified specialists, we are extremely grateful to our contributors who were prepared to lucidly present their knowledge and expertise within the covers of the present book. One of the conclusions of this book must be that the special surgical skills needed for adequate treatment of gynecological cancer cannot be developed within general residency programs. Thus, European gynecologists should examine whether and to what extent additional training as usual in the U.S.A. is necessary. The editors want to thank the Royal College of Obstetricians and Gynecologists for their kind permission to reproduce the contribution of J.A. Jordan, chapter 7 from *Pre-clinical neoplasia of the cervix* London 1982. A.P.M. Heintz, M.D., C.Th.G. i66th M.
