The Geography Of Religion In England:

The Geography of Religion in England John Dennis Gay, 1971 **The Geography of Religion in England** John Dennis Gay, 1971 **Rival Jerusalems** K. D. M. Snell, Paul S. Ell, 2000-10-26 This pioneering book is based upon very extensive analysis of the famous 1851 Census of Religious Worship and earlier sources such as the 1676 Compton Census The authors stress contextual and regional understanding of religion Among the subjects covered for all of England and Wales are the geography of the Church of England Roman Catholicism the old and new dissenting denominations the spatial complementarity of denominations and their importance for political history A range of further questions are then analysed such as regional continuities in religion the growth of religious pluralism Sunday schools and child labour during industrialisation free and appropriated church sittings landownership and religion and urbanisation and regional secularisation This book's advanced methods and findings will have far reaching influence within the disciplines of history historical and cultural geography religious sociology and in the social science community general *The Oxford Handbook of Religious Conversion* Lewis Ray Rambo, Charles E. Farhadian, 2014 The Oxford Handbook of Religious Conversion offers a comprehensive exploration of the dynamics of religious conversion which for centuries has profoundly shaped societies cultures and individuals throughout the world Scholars from a wide array of religions and disciplines interpret both the varieties of conversion experiences and the processes that inform this personal and communal phenomenon This volume examines the experiences of individuals and communities who change religions those who experience an intensification of their religion of origin and those who encounter new religions through colonial intrusion missionary work and charismatic and revitalization movements The thirty two innovative essays provide overviews of the history of particular religions including Hinduism Buddhism Confucianism Taoism Sikhism Islam Christianity Judaism indigenous religions and new religious movements The essays also offer a wide range of disciplinary perspectives psychological sociological anthropological legal political feminist and geographical on methods and theories deployed in understanding conversion and insight into various forms of deconversion Secularization in the Long 1960s Clive D. Field, 2017-03-16 Secularization in the Long 1960s Numerating Religion in Britain provides a major empirical contribution to the literature of secularization It moves beyond the now largely sterile and theoretical debates about the validity of the secularization thesis or paradigm Combining historical and social scientific perspectives Clive D Field uses a wide range of quantitative sources to probe the extent and pace of religious change in Britain during the long 1960s In most cases data is presented for the years 1955 80 with particular attention to the methodological and other challenges posed by each source type Following an introductory chapter which reviews the historiography introduces the sources and defines the chronological and other parameters Field provides evidence for all major facets of religious belonging behaving and believing as well as for institutional church measures The work engages with and largely refutes Callum G Brown's influential assertion that Britain experienced

revolutionary secularization in the 1960s which was highly gendered in nature and with 1963 the major tipping point. Instead a more nuanced picture emerges with some religious indicators in crisis others continuing on an existing downward trajectory and yet others remaining stable. Building on previous research by the author and other scholars and rejecting recent proponents of counter secularization the long 1960s are ultimately located within the context of a longstanding gradualist and still ongoing process of secularization in Britain.

A Social History of England 1851-1990 Francois Bedarida, 2013-06-17 In this the second edition of A Social History of England Francois Bedarida has added a new final chapter on the last fifteen years. The book now traces the evolution of English society from the height of the British Empire to the dawn of the single European market. Making full use of the Annales school of French historiography Bedarida takes his inquiry beyond conventional views to penetrate the attitudes, behaviour and psychology of the British people.

Church and State in Modern Britain 1700-1850 Richard Brown, 2002-01-04 In this the second part of his history of the Industrial Revolution Richard Brown examines the political and religious developments which took place in Britain between the 1780s and 1840s in terms of the aristocratic elite and through the expression of alternative radical ideologies. Opening with a discussion of the nature of history and of Britain in 1700 it goes on to consider Britain's foreign policy, the emergence of the modern state and the mid century crisis of the 1840s. Unlike many previous works it emphasises British not just English history. It is this diversity of experience and the focus on continuity as well as change, women as well as men that makes this a distinctive text. Students will also find the theoretical foundations of historical narrative and analysis clearly explained.

The Mid-Victorian Generation K. Theodore Hoppen, 2000-06-30 This the third volume to appear in the New Oxford History of England covers the period from the repeal of the Corn Laws to the dramatic failure of Gladstone's first Home Rule Bill. In his magisterial study of the mid Victorian generation Theo Hoppen identifies three defining themes. The first he calls established industrialism, the growing acceptance that factory life and manufacturing had come to stay. It was during these four decades that the balance of employment shifted irrevocably. For the first time in history more people were employed in industry than worked on the land. The second concerns the multiple national identities of the constituent parts of the United Kingdom. Dr Hoppen's study of the histories of Ireland, Scotland, Wales and the Empire reveals the existence of a variety of particular and overlapping national traditions flourishing alongside the increasingly influential structure of the unitary state. The third defining theme is that of interlocking spheres which the author uses to illuminate the formation of public culture in the period. This he argues was generated not by a series of influences operating independently from each other but by a variety of intermeshed political, economic, scientific, literary and artistic developments. This original and authoritative book will define these pivotal forty years in British history for the next generation.

Counting Religion in Britain, 1970-2020 Clive D. Field, 2021-12-09 Counting Religion in Britain 1970-2020 the fourth volume in the author's chronological history of British secularization sheds significant new light on the nature, scale and timing of religious change in Britain during the past

half century with particular reference to quantitative sources Adopting a key performance indicators approach twenty one facets of personal religious belonging behaving and believing are examined offering a much wider range of lenses through which the health of religion can be viewed and appraised than most contemporary scholarship Summative analysis of these indicators by means of a secularization dashboard leads to a reaffirmation of the validity of secularization in its descriptive sense as the dominant narrative and direction of travel since 1970 while acknowledging that it is an incomplete process and without endorsing all aspects of the paradigmatic expression of secularization as a by product of modernization
