The Ghost In The Machine The Danube Edition:

The Ghost in the Machine Arthur Koestler, 1976 **The Host in the Machine** Angela Thomas-Jones, 2010-07-27 This book tackles online social networks by navigating these systems from the birth to the death of their digital presence Navigating the social within the digital can be a contentious undertaking as social networks confuse the boundary between offline and online relationships These systems work to bring people together in an online environment yet participation can dislocate users from other relationships and deviant online behaviour can create offline issues The author begins by examining the creation of a digital presence in online networks popularized by websites such as Facebook and MySpace The book explores how the digital presence influences how social cultural and professional relationships are discovered forged maintained and broken and journeys through the popular criticisms of social networking such as employee time wasting bullying stalking the alleged links between social networks and suicide and the decline of a user s public image Social networks are often treated as morally ambiguous spaces which highlights a dissonance between digital and social literacies This discord is approached through an exploration of the everyday undercurrents present in social networks The discussion of the digital presence ends by addressing the intricacies of becoming digitally dead which explores how a user removes their identity with finality from social networks and the entire web Identifies the undercurrents present in social networks and explores how these influence everyday life Provides insight into how the digital presence insidiously encroaches on offline aspects of a user s life Examines the idea of becoming digitally dead by discussing the often taboo subject of virtual and non virtual suicide in the context of social networks

The Ghost in the Machine Arthur Koestler, 1967 With this new work Arthur Koestler completes a cycle which started with *The Sleepwalkers* and continued with *The Act of Creation* They were concerned with scientific discovery and artistic inspiration the glory of man *The Ghost in the Machine* culminates in a discussion of the predicament of man the pathology of the human mind The streak of insanity which runs through the history of our species points he argues to the possibility that somewhere along the line of its ascent to prominence something has gone wrong

Emotions and Religious Dynamics Nathaniel A. Warne, 2016-05-13 We all feel emotions and are moved to action by them Religious communities often select and foster certain emotions over others Without understanding this it is hard to grasp the way groups view the world and each other Often it is the underlying emotional pattern of a group rather than its doctrines that either divides it from or attracts it to others These issues so important in today s world are explored in this book in a genuinely interdisciplinary way by anthropologists psychologists theologians and historians of religion and in some detailed studies of well and less well known religious traditions from across the world

Surviving the Future David Fleming, Shaun Chamberlin, 2016-08-04 *Surviving the Future* is a story drawn from the fertile ground of the late David Fleming's extraordinary *Lean Logic A Dictionary for the Future and How to Survive It* That hardback consists of four hundred and four interlinked dictionary entries inviting readers to choose their own path through its radical vision Recognizing that *Lean Logic's* sheer size and unusual structure can be daunting Fleming's long time collaborator Shaun Chamberlin has selected and edited one of these potential narratives to create *Surviving the Future* The content rare insights and uniquely enjoyable writing style remain Fleming's but are presented here at a more accessible paperback length and in conventional read it front to back format The subtitle *Culture Carnival and Capital in the Aftermath of the Market Economy* hints at Fleming's vision He believed that the market economy will not survive its inherent flaws beyond the early decades of this century and that its failure will bring great challenges but he did not dwell on this We know what we need to do We need to build the sequel to draw on inspiration which has lain dormant like the seed beneath the snow *Surviving the Future* lays out a compelling and powerfully different new economics for a post growth world One that relies not on taut competitiveness and eternally increasing productivity putting the grim into reality but on the play humor conversation and reciprocal obligations of a rich culture Building on a remarkable breadth of intellectual and cultural heritage from Keynes to Kumar Homer to Huxley Mumford to MacIntyre Scruton to Shiva Shakespeare to Schumacher Fleming describes a world in which as he says there will be time for music This is the world that many of us want to live in yet we are told it is idealistic and unrealistic With an evident mastery of both economic theory and historical precedent Fleming shows that it is not only desirable but actually the only system with a realistic claim to longevity With friendliness humor and charm *Surviving the Future* plucks this vision out of our daydreams and shows us how to make it real Step into the world of David Fleming you'll be so glad you did Rob Hopkins cofounder of the Transition Network

Research in Early Childhood Education for Sustainability Julie Davis, Sue Elliott, 2014-06-20 Sustainability is a global issue that urgently needs addressing and for which the most serious consequences are for children and future generations This insightful research text tackles one of the most significant contemporary issues of our times the nexus

between society and environment and how early childhood education can contribute to sustainable living By offering international and multidisciplinary research perspectives on Early Childhood Education for Sustainability each chapter explores and investigates the complex topic of sustainability and its relationship to early childhood education A particular emphasis that runs through this text is young children as empowered citizens capable of both contributing to and creating change for sustainability The chapter authors work from or are aligned with a transformative education paradigm that suggests the socio constructivist frameworks currently underpinning Early Childhood Education require reframing in light of the social transformations necessary to address humanity s unsustainable unjust and unhealthy living patterns This research text is designed to be provocative and challenging in so doing it seeks to encourage exploration of current understandings about Early Childhood Education for Sustainability offers new dimensions for more deeply informed practice and proposes avenues for further research in this field

Planning Canadian Regions Gerald Hodge,Ira M. Robinson,2007-10-01

Planning Canadian Regions is the first book to consolidate the history evolution current practice and future prospects for regional planning in Canada As planners grapple with challenges wrought by globalization the evolution of massive new city regions and the pressures for sustainable and community economic development a deeper understanding of Canada s approaches is invaluable Hodge and Robinson identify the intellectual and conceptual foundations of regional planning and review the history and main modes of regional planning for rural regions economic development regions resource development regions and metropolitan and city regions They draw lessons from Canada s past experience and conclude by proposing a new paradigm addressing the needs of regional planning now and in the future emphasizing regional governance greater inclusiveness and integration of physical planning with planning for economic sustainability and natural ecosystems Planning Canadian Regions will be a much needed text for students and teachers of regional planning and an indispensable reference for planning practitioners It will also find a receptive audience in such disciplines as urban planning environmental studies geography political science public administration and economics

Threads of Life Richard Freadman,2001-02

Many autobiographers share profound questions about human life with their readers questions like To what extent was my life imposed on me To what extent did I bring it about through particular choices and actions through the activity of my own will Indeed the issue of the will is central to autobiographical writing and some of the greatest autobiographies give extended consideration to the will its nature its powers its limitations the forms of freedom constraint and expression it finds in various cultures its role in particular human lives In this new study unprecedented in subject and scope Richard Freadman offers the first sustained account of how changing theological philosophical and psychological accounts of the human will have been reflected in the writing of autobiography and of how autobiography in its turn has helped shape various understandings of the will Early chapters trace narrative representations of the will from antiquity the Greeks and Augustine to postmodernism Derrida and Barthes with particular emphasis on late modernity s culture of the will Later chapters then present detailed and

powerfully original readings of autobiographical texts by Louis Althusser Roland Barthes B F Skinner Ernest Hemingway Simone de Beauvoir Arthur Koestler Stephen Spender and Diana Trilling Freadman's interdisciplinary approach to autobiography and the will includes a theoretical defense of the view that autobiographers are in varying degrees agents in their own texts *Threads of Life* argues that late modernity has inherited deeply conflicted attitudes to the will Freadman suggests that these attitudes now deeply embedded in contemporary cultural discourse need reexamining In this he contends reflective autobiography has an important part to play
