The Juridical Terminology of International Relations in Egyptian Texts Through Dyn. XVIII. David Lorton, 1972 **The Juridical Terminology of International Relations in Egyptian Texts Through Dyn. XVIII.** David Lorton, 1974

International Relations in the Ancient Near East M. Liverani, 2015-12-22 The ancient civilizations of the Near East Egypt Assyria Babylonia the Hittites and Canaanites constituted the first formalized international relations system in world history Holy wars peace treaties border regulations trade relations and the extradition of refugees were problems for contemporary ambassadors and diplomats as they are today Mario Liverani reconstructs the procedures of international relations in the period c 1600-1100 BC using historical semiotics communication theory and economic and political anthropology **Thutmose III** Eric H. Cline, 2006 Extensive treatment of this pivotal figure in the ancient Mediterranean world Origins of the Just War Rory Cox, 2026-02-03 A groundbreaking history of the ethics of war in the ancient Near East *Origins of the Just War* reveals the incredible richness and complexity of ethical thought about war in the three millennia preceding the Greco-Roman period establishing the extent to which ancient just war thought prefigured much of what we now consider to be the building blocks of the Western just war tradition In this incisive and elegantly written book Rory Cox traces the earliest ideas concerning the complex relationship between war ethics and justice Excavating the ethical thought of three ancient Near Eastern cultures Egyptian Hittite and Israelite he demonstrates that the history of the just war is considerably more ancient and geographically diffuse than previously assumed Cox shows how the emergence of just war thought was grounded in a desire to rationalise sacralise and ultimately to legitimise the violence of war Rather than restraining or condemning warfare the earliest ethical thought about war reflected an urge to justify state violence Cox terms this presumption in favour of war *ius pro bello* the right for war characterizing it as a meeting point of both abstract and pragmatic concerns Drawing on a diverse range of ancient sources *Origins of the Just War* argues that the same imperative still underlies many of the assumptions of contemporary just war thought and highlights the risks of applying moral absolutism to the fraught ethical arena of war Foreigners and Egyptians in the Late Egyptian Stories Camilla Di Biase-Dyson, 2013-06-17 In *Foreigners and Egyptians in the Late Egyptian Stories* Camilla Di Biase-Dyson applies systemic functional linguistics literary theory and New Historicist approaches to four of the Late Egyptian Stories and shows how language was exploited to establish the narrative roles of literary protagonists The analysis reveals the shifting power dynamics between the Doomed Prince and his foreign wife and the parody in the depiction of the Hyksos ruler Apophis and his Theban counterpart Seqenenre It also sheds light on the weight of history in the sketch of the Rebel of Joppa and the general Djehuty and explains the interplay of social expectations in the encounters between the envoy Wenamun and the Levantine princes with whom he seeks to trade Overall Di Biase-Dyson's monograph is an original interdisciplinary examination of an exciting corpus of ancient literary texts Nikolaos Lazaridis *Journal of Near Eastern Studies* **The**

Oxford Handbook of Egyptology Ian Shaw, Elizabeth Bloxam, 2020-11-10 The Oxford Handbook of Egyptology offers a comprehensive survey of the entire study of ancient Egypt from prehistory through to the end of the Roman period. It seeks to place Egyptology within its theoretical, methodological, and historical contexts, indicating how the subject has evolved and discussing its distinctive contemporary problems, issues, and potential. Transcending conventional boundaries between archaeological and ancient textual analysis, the volume brings together 63 chapters that range widely across archaeological, philological, and cultural sub-disciplines, highlighting the extent to which Egyptology as a subject has diversified and stressing the need for it to seek multidisciplinary methods and broader collaborations if it is to remain contemporary and relevant. Organized into ten parts, it offers a comprehensive synthesis of the various sub-topics and specializations that make up the field as a whole, from the historical and geographical perspectives that have influenced its development and current characteristics to aspects of museology and conservation and from materials and technology as evidenced in domestic architecture and religious and funerary items to textual and iconographic approaches to Egyptian culture. Authoritative yet accessible, it serves not only as an invaluable reference work for scholars and students working within the discipline but also as a gateway into Egyptology for classicists, archaeologists, anthropologists, sociologists, and linguists. International Law in Antiquity

David J. Bederman, 2001-03-05 Reevaluation of the origins of international law, examining ancient Greece, Rome, and the Near East. **Boundaries of the Ancient Near Eastern World** Meir Lubetski, Claire Gottlieb, Sharon Keller, 1997-01-01 For over three score years, Cyrus H. Gordon's scholarship and teaching have provided new directions to the study of the ancient Near East. This collection of 34 essays in honour of his 90th birthday, edited by three of his former pupils, celebrates his fascinating and remarkable achievements and reflects his broad command of ancient studies. The global impact of his research can be seen from the geographical dispersion of the outstanding scholars who have written here on the following topics: archaeology, Bible studies, Ugaritic, Aramaic, Arabic, Egypt, Semitic, the cuneiform world, Indo-European, Samaritan, the Graeco-Roman world, mediaeval studies. The inclusion of a complete bibliography of Gordon's works is of singular value. **Admonition and Curse** Noel Weeks, 2004-10-01 The occurrence of treaties throughout the Ancient Near East has been investigated on a number of occasions, generally in order to resolve certain questions arising in the biblical field. As a result of that focus, the existence of a similar institution in a number of different cultures has not been treated as a problem in itself. Generally, the existence of treaties throughout the area has been taken for granted, or a simple borrowing model has been used to explain how similar forms came to be used in different cultures. Why forms were similar across the area has not been probed. This work investigates treaty occurrences in different cultures and finds that the forms used correlate with ways of maintaining political control, both internally and over vassals. Related concepts are projected in official accounts of history. Thus, one can roughly distinguish threats based on power from persuasion based on benevolence and historical precedent, though various combinations of these two occur. There is a likely further connection of the means chosen

to the degree of centralisation of power within the society Underlying the local traditions is a common tradition which has to be dated to the pre literate period Biblical covenants fit within this pattern The cultures treated are Mesopotamia the Hittites Egypt Syrian centres and Israel

Syntactic and Lexico-semantic Aspects of the Legal Register in Ramesside Royal Decrees Arlette David, 2006 Analysis of the legal register of a corpus of some fifty Ramesside royal decrees dating from 1300 to 1100 B C in the wider context of forensic discourse analysis of the legislative genre in an attempt to establish constants in forensic linguistics that span time and space The general character and formulation of these normative documents reveal a remarkable homogeneity and represent a specific linguistic register that has a common textemic pragmatic and narratologic structure as well as a coherent syntactic and lexico semantic usage as modern legal dialects do today Furthermore the research tries to enrich the understanding of Egyptian legal terminology and legal categories by a systematic semantic analysis of the classifiers used in the legal lexicon classifiers in the hieroglyphic system represent iconic elements that have no phonetic value but assign words to semantic classes The extremely interesting Egyptian graphic categorization set of classifiers present in these texts offers some invaluable insights into the Egyptian conceptual organization system
