In the shape of bills banknotes and accounting books it was indispensible to the economy As forms and files it was essential to bureaucracy As letters it became the setting for the invention of the modern soul and as newsprint it became a stage for politics In this brilliant new book Lothar M ller describes how paper made its way from China through the Arab world to Europe where it permeated everyday life in a variety of formats from the thirteenth century onwards and how the paper technology revolution of the nineteenth century paved the way for the creation of the modern daily press His key witnesses are the works of Rabelais and Grimmelshausen Balzac and Herman Melville James Joyce and Paul Val ry M ller writes not only about books however he also writes about pamphlets playing cards papercutting and legal pads We think we understand the Gutenberg era but we can understand it better when we explore the world that underpinned it the paper age Today with the proliferation of digital devices paper may seem to be a residue of the past but M ller shows that the humble technology of paper is in many ways the most fundamental medium of the modern world 5000 Years of Geometry Christoph I.
