Streissguth, 2009-06-24 This encyclopedia provides an abundance of information on the Middle Ages The Middle Ages began with the fall of the western Roman Empire in the fifth century and ended with the fifteenth century Renaissance Readers will learn about important religious political social and cultural transformations Entries cover people events and philosophies of the medieval age      The Quest for the Christ Child in the Later Middle Ages Mary Dzon, 2017-01-25 Beginning in the twelfth century clergy and laity alike started wondering with intensity about the historical and developmental details of Jesus' early life Was the Christ Child like other children whose characteristics and capabilities depended on their age Was he sweet and tender or formidable and powerful Not finding sufficient information in the Gospels which are almost completely silent about Jesus' childhood medieval Christians turned to centuries old apocryphal texts for answers In The Quest for the Christ Child in the Later Middle Ages Mary Dzon demonstrates how these apocryphal legends fostered a vibrant and creative medieval piety

Popular tales about the Christ Child entertained the laity and at the same time were reviled by some members of the intellectual elite of the church. In either case such legends so persistent left their mark on theological devotional and literary texts. The Cistercian abbot Aelred of Rievaulx urged his monastic readers to imitate the Christ Child's development through spiritual growth. Francis of Assisi encouraged his followers to emulate the Christ Child's poverty and rusticity. Thomas Aquinas for his part believed that apocryphal stories about the Christ Child would encourage youths to be presumptuous while Birgitta of Sweden provided pious alternatives in her many Marian revelations. Through close readings of such writings Dzon explores the continued transmission and appeal of apocryphal legends throughout the Middle Ages and demonstrates the significant impact that the Christ Child had in shaping the medieval religious imagination.

**The Making of Memory in the Middle Ages** Lucie Doležalová, 2009-11-17 Memory in the Middle Ages has received particular attention in recent decades yet the topic remains difficult to grasp and the research on it rather fragmented. This book gathers particular case studies on memory in different parts of medieval Europe and in a variety of fields including literatures, languages, manuscript studies, history, history of ideas, philosophy, social history, and art history. The studies address on the one hand memory as means of storing and recuperating knowledge, arts of memory and memory aids, and on the other hand memory as remembering and constructing the past, including the subject of forgetting. It should be useful to all interested in medieval culture, literature, and history. Contributors are Milena Bartlov, Bergsveinn Birgisson, Irene Bueno, Vincent Challet, Greti Dinkova, Bruun Lucie Doležalová, David Falvey, Carmen Florea, Cécile Giraud, Laura Iseppi, de Filippis, Farkas Gábor, Kiss Róbert, Lorenz Else Mundal, Előd Némethy, William J. **The Central Middle Ages** Daniel Power, 2006-03-09 The period from the late tenth to the early fourteenth centuries was one of the most dynamic in European history. Latin Christendom found a new confidence which has left its mark upon the landscape in the form of the great cathedrals and castles while thousands of new towns and villages were founded. The continent was carved up into dynastic kingdoms and principalities from which the European state system would evolve. An age of great religious enthusiasm it developed a darker side in the form of the Crusades and the persecution of heretics and Jews. In this book seven experts in the field examine how Europe was transformed in the Central Middle Ages. Thematic chapters analyse the political, social, economic, religious, and intellectual history of Latin Christendom and trace its expansion to the north, south, and east. As well as many familiar topics the authors discuss less well known aspects of the period such as the popular experience of religion or the new kingdoms of east central Europe. The book includes a chronology of developments, a glossary, maps, illustrations, and guidance for further reading.

The Cambridge Illustrated History of the Middle Ages Robert Fossier, 1986 This is the second volume of one of the finest general introductions to the medieval world of recent times, first published in French by Armand Colin. Volume II begins at the turn of the millennium and covers the extraordinary rebirth of Europe in terms of demographic expansion.

agrarian settlement and organisation the establishment of towns and villages the ascendancy of the feudal system the appearance of formal states and kingdoms and the dramatic controlling ascendancy of the western Church In the east despite the external appearance of grandeur the Islamic countries were being torn apart by mutual rivalry while the Byzantine empire lost massive border territories through political and economic incompetence Full coverage is given to both east and west and their artistic heritage is displayed lavishly in many of the colour plates A comprehensive bibliography is also included
