King,2017-04-21 The author of *How Animals Grieve* contends that religion is a consequence of primate evolution in this brilliant book Booklist starred review Religion has been a central part of human experience since at least the dawn of recorded history The gods change as do the rituals but the underlying desire remains a desire to belong to something larger greater most lasting than our mortal finite selves But where did that desire come from Can we explain its emergence through evolution Yes says biological anthropologist Barbara J King and doing so not only helps us to understand the religious imagination but also reveals fascinating links to the lives and minds of our primate cousins *Evolving God* draws on King's own fieldwork among primates in Africa and paleoanthropology of our extinct ancestors to offer a new way of thinking about the origins of religion one that situates it in a deep need for emotional connection with others a need we share with apes and

monkeys Though her thesis is provocative and she's not above thoughtful speculation King's argument is strongly rooted in close observation and analysis She traces an evolutionary path that connects us to other primates who like us display empathy make meanings through interaction create social rules and display imagination the basic building blocks of the religious imagination With fresh insights she responds to recent suggestions that chimpanzees are spiritual or even religious beings and that our ancient humanlike cousins carefully disposed of their dead well before the time of Neandertals Her interpretations result in a provocative hypothesis about the evolution of spirituality The Dallas Morning News
