The Gi Plan:

A framework for a green infrastructure planning approach in the Gauteng City-Region Christina Culwick, Kerry Bobbins, Anton Cartwright, Gregg Oelofse, Myles Mander, Stuart Dunsmore, 2016-09-01 As the population economy and urban built environment in the Gauteng City Region GCR expand government is increasingly under pressure to provide urban infrastructure to support growth It is increasingly important that this infrastructure is sustainable minimising the negative environmental impacts often associated with traditional forms of urban development Green Infrastructure GI is the interconnected set of natural and man made ecological systems green spaces and other landscape features that provide services and strategic functions in the same way as traditional infrastructure In harnessing the benefits of ecosystem services GI has emerged as a more efficient cost effective and sustainable alternative and sometimes accompanying approach to conventional forms of infrastructure Despite international evidence demonstrating how GI can be used as an alternative to or in tandem with traditional infrastructure the GI approach has so far gained only limited traction in the GCR In 2013 the GCRO published the State of Green Infrastructure in the GCR report The report established the principles that underpin GI used available data to map the extent of GI networks in the region assessed to what extent municipalities were aware of and applying a GI approach and demonstrated a possible way to value GI in local government financial systems The conclusions of the State of Green Infrastructure report were used to guide the next phase of GCRO s research in support of the adoption of GI approach a phase focused on better understanding the opportunities for implementing GI in planning and infrastructure development programmes and on addressing some of the challenges associated with shifts towards this approach A framework for a green infrastructure planning approach in the Gauteng City Region GCRO s fourth Research Report builds on the foundations laid in the State of Green Infrastructure report It assembles expert inputs and reflections from collaborative stakeholder discussions in what was known as the Green Infrastructure CityLab to illustrate important considerations for the development of a GI planning approach in the Gauteng City Region GCR The report is divided into three broad sections Part A introduces the theoretical underpinnings of a GI approach and builds an argument for the importance of incorporating GI into planning and infrastructure development in the GCR Part B presents three pieces written by external experts They consider how GI and ecosystem services can be valued by municipalities and how so called grey green infrastructure design solutions can be implemented in the GCR Part C reflects on the stakeholder engagement process that has been undertaken primarily through the GI CityLab to deepen understanding of how GI can be embedded in municipal practice Based on these research findings this report concludes with a strategy for GCRO s next phase of work in its ongoing Green Assets and Infrastructure Project
