The Gold Bug Variations:

Gold Bug Variations Richard Powers, 1992-07-31 A national bestseller voted by Time as the 1 novel of 1991 selected as one of the Best Books of 1991 by Publishers Weekly and nominated for a National Book Critics Circle Award a magnificent story that probes the meaning of love science music and art by the brilliant author of Three Farmers on Their Way to a Dance

The Gold Bug Variations Richard Powers, 1992 A double love story of two young couples separated by a distance of 25 years The author also wrote Prisoner's Dilemma and Three Farmers on Their Way to a Dance The Gold Bug Variations Richard Powers, 2025-06-12 A love story of charm and substance brimming over with ideas yet anchored in emotional truth SUNDAY TELEGRAPH Powers has triumphantly restored the philosophical novel OBSERVER A heroic tour de force NEW YORK TIMES In 1957 brilliant biologist Stuart Ressler sets out to crack the genetic code Yet his efforts are sidetracked by other more complex codes social moral musical and spiritual as he falls in love with a member of his research team Years later another young man and woman investigate a different mystery why did the promising Ressler suddenly vanish from the world of science Strand by strand these two love stories intertwine in a double helix of desire in an enthralling tale about new love and the mysteries of science *Goldbug Variations* Powers, 1994-03-01 **Wild Science** Janine Marchessault, Kim Sawchuk, 2013-10-18 Wild Science investigates the world wide boom in health culture While self help health books and medical dramas are popular around the globe we are bombarded with daily media images of DNA research and news reports about cloning the fight against AIDS cancer and depression With popular culture now the principal means through which the non scientific population encounters science why do certain images of science get promoted above others Contributors examine the public meanings of science revealing the frictions and contradictions within popular representations of what medicine can and should do Focusing on the visual culture of medicine they show how representations of science have a direct impact on popular perceptions of the limits of science and ultimately on health education funding and research and examine the belief that media literacy in popular representations of medicine makes an ethical public discourse on the aims of science possible With sections addressing the new visual technologies which make the human body into a virtual territory the diagnostic and medical practices centered around women's bodies and popular debates around genetics and identity Wild Science argues that science is a practice bound in values and institutions and argues for a responsible engagement with the public cultures of science and health **Understanding Richard Powers** Joseph Dewey, 2002 Dewey contends that while Powers's novels investigate the most pressing issues of the new millennium the novelist is most deeply interested in the same thematic argument that consumed Ralph Waldo Emerson and Emily Dickinson the problem of the self the deep and unshakable loneliness that has always been at the heart of the American literary imagination BOOK JACKET The Cryptographic Imagination Shawn James Rosenheim, 2020-03-24 Originally published in 1996 In The Cryptographic Imagination Shawn Rosenheim uses the writings of Edgar Allan Poe to pose a set of questions pertaining to literary genre

cultural modernity and technology Rosenheim argues that Poe's cryptographic writing his essays on cryptography and the short stories that grew out of them requires that we rethink the relation of poststructural criticism to Poe's texts and more generally reconsider the relation of literature to communication Cryptography serves not only as a template for the language character and themes of much of Poe's late fiction including his creation the detective story but also as a secret history of literary modernity itself Both postwar fiction and literary criticism the author writes are deeply indebted to the rise of cryptography in World War II Still more surprising in Rosenheim's view Poe is not merely a source for such literary instances of cryptography as the codes in Conan Doyle's *The Dancing Men* or in Jules Verne but through his effect on real cryptographers Poe's writing influenced the outcome of World War II and the development of the Cold War However unlikely such ideas sound *The Cryptographic Imagination* offers compelling evidence that Poe's cryptographic writing clarifies one important avenue by which the twentieth century called itself into being The strength of Rosenheim's work extends to a revisionistic understanding of the entirety of literary history as a repression of cryptography and then in a breathtaking shift of register interlinks Poe's exercises in cryptography with the hyperreality of the CIA the Cold War and the Internet What enables this extensive range of applications is the stipulated tension Rosenheim discerns in the relationship between the forms of the literary imagination and the condition of its mode of production Cryptography in this account names the technology of literary production the diacritical relationship between decoding and encoding that the literary imagination dissimulates as hieroglyphics the hermeneutic relationship between a sign and its content Donald E Pease Dartmouth College

Identification Practices in Twentieth-Century Fiction Rex Ferguson, 2021-07-14 The task of identifying the individual has given rise to a number of technical innovations including fingerprint analysis and DNA profiling A range of methods have also been created for storing and classifying people's identities such as identity cards and digital records *Identification Practices and Twentieth Century Fiction* tests the hypothesis that these techniques and methods as practiced in the UK and US in the long 20th century are inherently related to the literary representation of self identity from the same period Until now the question of who one is in the sense of formal identification has remained detached from the question of who one is in terms of the representation of unique individuality Placing these two questions in dialogue allows for a re evaluation of the various ways in which uniqueness has been constructed during the period and for a re assessment of the historical and literary historical context of such construction In chapters ranging across the development of fingerprinting the institution of identity cards during the Second World War DNA profiling and contemporary digital surveillance and an analysis of writing by authors including Joseph Conrad Graham Greene Elizabeth Bowen J G Ballard Don DeLillo and Jennifer Egan *Identification Practices and Twentieth Century Fiction* makes an original contribution to the disciplines of English Literature History and Cultural Studies *Time and the Literary* Karen Newman, Jay Clayton, Marianne Hirsch, 2013-09-13 Time and the literary the immediacy of information technology has supposedly annihilated both Email cell phones satellite

broadcasting seem to have ended the long standing tradition of encoding our experience of time through writing Paul de Man's seminal essay *Literary History and Literary Modernity* and newly commissioned essays on everything from the human genome to grammatical tenses argue however that the literary constantly reconstructs our understanding of time From eleventh century France or a science fiction future Time and the Literary shows how these two concepts have been and will continue to influence each other **This Mad "instead"** Arthur Michael Saltzman, 2000 Saltzman reveals figuration to be both inevitable and inevitably unreliable and he illustrates how these writers treat this condition not as an impasse but as a point of departure indeed as an artistic mandate and creative opportunity
