The Israeli Army, 1948-1973 Edward Luttwak, Dan Horowitz, 1984-08 **Parameters**, 1984 *The International Self* Mira M. Sucharov, 2012-02-01 *The International Self* explores an age old question in international affairs one that has been particularly pressing in the context of the contemporary Middle East what leads long standing adversaries to seek peace Mira M Sucharov employs a socio psychoanalytic model to argue that collective identity ultimately shapes foreign policy and policy change Specifically she shows that all states possess a distinctive role identity that tends to shape behavior in the international realm When policy deviates too greatly from the established role identity the population experiences cognitive dissonance and expresses this through counternarratives an unconscious representation of what the polity collectively fears in itself propelling political elites to realign the state s policy with its identity Focusing on Israel s decision to embark on negotiations leading to the 1993 agreement with the Palestine Liberation Organization PLO Sucharov sees this policy reversal as a reaction to the unease generated by two events in the 1980s the war in Lebanon and the first Palestinian Intifada that contradicted Israelis perceptions of their state as a defensive warrior Her argument bridges the fields of conflict resolution Middle East studies and international relations

Scouts Out! The Development Of Reconnaissance Units In Modern Armies [Illustrated Edition] John J. McGrath, 2014-08-15 Illustrated with 60 maps plans and diagrams Reconnaissance and counter reconnaissance are battlefield missions as old as military history itself and missions for which many armies have created specialized units to perform In most cases these units were trained equipped and used differently from the majority of an army s fighting units Horse cavalry performed these missions for centuries for it had speed and mobility far in excess of main battle units Once the horse was replaced by mechanization however the mobility advantage once enjoyed by the horse cavalry disappeared Since the early 20th century the search for the proper mix of equipment the proper organization and the proper employment of reconnaissance units has bedeviled armies around the world This survey uses a diverse variety of historical cases to illustrate the enduring issues that surround the equipping organizing and employment of reconnaissance units It seems that these specialized units are either too heavily or too lightly equipped and too narrowly specialized or too conventionally organized Pre war reconnaissance doctrines tend to undergo significant change once fighting begins leading to post conflict analysis that reconnaissance units were misused in one way or another McGrath ends his study with an intriguing conclusion about the role that specialized reconnaissance units should have in the future that may surprise many readers *Other People's Wars* Brent L. Sterling, 2021 Brent L Sterling examines how well or poorly the US military has learned lessons and applied findings from analyzing foreign wars through observer missions and post conflict military to military liaisons Preparing for the next war at an unknown date in the future against an undetermined opponent is an inherently difficult undertaking with extremely high stakes Even the most detailed exercises and wargames do not truly simulate combat and the fog of war Thus militaries the world over have studied foreign wars to

see what lessons can be gleaned but the effectiveness of this learning process has rarely been evaluated Sterling's goals are to better understand learning dynamics in the military to better determine what types of knowledge can be gained from foreign wars to identify common pitfalls and to propose ways to maximize the benefits for doctrine organization and training This book explores four major cases of US observation missions at key junctures in history the Crimean War 1853-56 the Russo-Japanese War 1904-05 the Spanish Civil War 1936-39 and the Yom Kippur War 1973 These conflicts preceded the US Civil War First World War Second World War and the Revolution in Military Affairs of the Gulf War The case studies show that the observer missions can yield significant benefits if the right conditions are met

Professional Journal of the United States Army, 1984

Fratricide in the Holy Land Avner Falk, 2005-02-17 This is the first English language book ever to apply psychoanalytic knowledge to the understanding of the most intractable international struggle in our world today the Arab-Israeli conflict Two ethnic groups fight over a single territory that both consider to be theirs by historical right essentially a rational matter But close historical examination shows that the two parties to this tragic conflict have missed innumerable opportunities for a rational partition of the territory between them and for a permanent state of peace and prosperity rather than perennial bloodshed and misery Falk suggests that a way to understand and explain such irrational matters is to examine the unconscious aspects of the conflict He examines large group psychology nationalism group narcissism psychogeography the Arab and Israeli minds and suicidal terrorism and he offers psychobiographical studies of Ariel Sharon and Yasser Arafat two key players in this tragic conflict today

Creating Military Power Risa Brooks, 2007-04-09 Creating Military Power examines how societies cultures political structures and the global environment affect countries military organizations Unlike most analyses of countries military power which focus on material and basic resources such as the size of populations technological and industrial base and GNP this volume takes a more expansive view The study's overarching argument is that states global environments and the particularities of their cultures social structures and political institutions often affect how they organize and prepare for war and ultimately impact their effectiveness in battle The creation of military power is only partially dependent on states basic material and human assets Wealth technology and human capital certainly matter for a country's ability to create military power but equally important are the ways a state uses those resources and this often depends on the political and social environment in which military activity takes place
