The Mad Professor:

The Mad Professor Hermann Sudermann,1928 *The Mad Professor* Rupert Schmitt,2011-02 The Mad Professor is the story of one man's battle in the 1960-70's Pacific Northwest against institutionalized bureaucracy and the strangulating effects of academic politics. Leo Bauer is first encouraged and then destroyed by the academic machine. The novel is literary, not easy to pigeonhole. The Mad Professor is a divergent novel, a confession of sorts by a man subversive to the organizations governing his life while remaining committed in his dedication to the natural world of Wisconsin, Utah, and Washington, whose natural history is contemplated and analyzed. Bureaucracy represented by a community college is explored through hallucinations, stream of consciousness, and magical realism. While Leo Bauer searches for authenticity, life hammers him, and he suffers losses of his profession, wife, reputation, and assets during the Vietnam era, the time of sex, drugs, rock, and roll, oil crisis, and recession. Despite the somber nature of his struggle, the novel has a great deal of broad and satiric humor. Leo Bauer's fantasy world becomes wilder and wilder, including his exploration of a huge DNA Helix, the prophecies of a lobotomized fellow teacher, and the Curriculum of Death in which students are bombed and attacked with strafing airplanes. This digressive narrative resists linearity. Leo Bauer commences life in Wisconsin where he experiences paradise among the lakes and forests. Throughout, this man searches for authenticity in a culture of false values. Librarians and booksellers should classify it as community college satire.

The Mad Professor Hermann Sudermann,1928 **Strange Case of the Mad Professor** Peter Kobel,2013-07-02 It was one of the biggest scandals in New York University history. Professor John Buettner Janusch, chair of the Anthropology Department, was convicted of manufacturing LSD and Quaaludes in his campus laboratory. He claimed the drugs were for an animal behavior experiment, but the jury found otherwise. B.J., as he was known, served two years in prison before being paroled, emerging to find his life and career in shambles. Four years later, he sought revenge by trying to kill the sentencing judge and others with poisoned Valentine's Day chocolates. After pleading guilty to attempted murder, he was sentenced to twenty years in prison where he died in mysterious circumstances. But before he was infamous at NYU, B.J., a scientific luminary, had also taught at Yale and Duke. One of the world's foremost authorities on lemurs, our distant primate relatives on the remote island of Madagascar, he brought international attention to these endearing and endangered creatures. He cofounded the Duke Lemur Center in North Carolina and inspired a whole generation of scientists to study them and conservationists to save them and their habitat. His trials captured national headlines, but the mad scientist's full story has never been told until now.

His mind passes the world through a mystic calculus and comes out with quaint theorems. His eyes view life through a cosmic geometry, and he formulates shocking hypotheses. Speaking more to animals and plants than to human beings, Prof. Philjez takes flight to the world of ideas from which he never returns.
