[The Confidence Code](#) Chris Lowry, 2024-01-20 When it comes to accomplishing our goals it's important to keep a positive mindset We often think that success is only possible if we have certain physical or material things but that's not always the case If we want to be successful we need to first believe that we can achieve our goals Many people give up on their goals

because they don't believe they can achieve them. They may have had a bad experience in the past or been told by others that they can't do it. Whatever the reason, if we don't believe we can achieve our goals, we won't even try. A positive mindset is essential to success. When we believe we can achieve our goals, we're more likely to take the necessary steps to reach them. We'll be more motivated to put in the hard work and persist even when things get tough. If you're struggling to stay positive, here are some tips to help you out:

- Focus on the things you can control. You may not be able to control everything that happens to you, but you can control your own thoughts and actions.
- Make a list of your positive qualities. Sometimes we need a reminder of the things we're good at.
- Spend time with positive people. Surround yourself with people who have a positive outlook on life and who will support your goals.
- Take care of yourself. Eat healthy, exercise, get enough sleep, and find ways to relieve stress.

When we're physically and mentally healthy, it's easier to stay positive. It's not always easy to maintain a positive mindset, but it's worth it.

The 7 Laws of Magical Thinking Matthew Hutson, 2013-02-26

In this witty and perceptive debut, a former editor at *Psychology Today* shows us how magical thinking makes life worth living. Psychologists have documented a litany of cognitive biases, misperceptions of the world, and explained their positive functions. Now Matthew Hutson shows us that even the most hardcore skeptic indulges in magical thinking all the time, and it's crucial to our survival. Drawing on evolution, cognitive science, and neuroscience, Hutson shows us that magical thinking has been so useful to us that it's hardwired into our brains. It encourages us to think that we actually have free will. It helps make us believe that we have an underlying purpose in the world. It can even protect us from the paralyzing awareness of our own mortality. In other words, magical thinking is a completely irrational way of making our lives make rational sense. With wonderfully entertaining stories, personal reflections, and sharp observations, Hutson reveals our deepest fears and longings. He also assures us that it is no accident his surname contains so many of the same letters as this imprint.
