Subbotsky, 2010-03-31. Magical thinking and behavior have traditionally been viewed as immature, misleading alternatives to scientific thought that in children inevitably diminish with age. In adults, these inclinations have been labeled by psychologists largely as superstitions that feed on frustration, uncertainty and the unpredictable nature of certain human activities. In *Magic and the Mind*, Eugene Subbotsky provides an overview of the mechanisms and development of magical thinking and beliefs throughout the life span while arguing that the role of this type of thought in human development should be reconsidered. Rather than an impediment to scientific reasoning or a byproduct of cognitive development in children, magical thinking is an important and necessary complement to these processes, enhancing creativity at problem solving and reinforcing coping strategies among other benefits. In adults, magical thinking and beliefs perform important functions both for individuals coping with unsolvable problems and stressful situations and for society, enabling mass influence and promoting social harmony. Operating in realms not bound by physical causality such as emotion, relationships and suggestion, magical thinking is an ongoing, developing psychological mechanism that Subbotsky argues is integral in the contexts of politics, commercial advertising and psychotherapy and undergirds our construction and understanding of meaning in both mental and physical worlds. *Magic and the Mind* represents a unique contribution to our understanding of the importance of magical thinking, offering experimental evidence and conclusions never before collected in one source. It will be of interest to students and scholars of developmental psychology as well as sociologists, anthropologists and educators. *Religion, Science, and Magic* Jacob Neusner, Ernest S. Frerichs, Paul Virgil McCracken Flesher, 1989. Every culture makes the distinction between true religion and magic, regarding one action and its result as miraculous while rejecting another as the work of the devil.

Surveying such topics as Babylonian witchcraft Jesus the magician magic in Hasidism and Kabbalah and magic in Anglo Saxon England these ten essays provide a rigorous examination of the history of this distinction in Christianity and Judaism Written by such distinguished scholars as Jacob Neusner Hans Penner Howard Kee Tzvi Abusch Susan R Garrett and Moshe Idel the essays explore a broad range of topics including how certain social groups sort out approved practices and beliefs from those that are disapproved providing fresh insight into how groups define themselves magic as an insider s term for the outsider s religion and the tendency of religious traditions to exclude the magical In addition the collection provides illuminating social cultural and anthropological explanations for the prominence of the magical in certain periods and literatures

Beckford's most important publications are listed in an Appendix and the volume opens with a short account of his contribution to sociology by Eileen Barker the editor and James T Richardson
