Animal Metaphors and the People of Israel in the Book of Jeremiah Benjamin Foreman, 2011-10-06 Though interest in the use of metaphor in the Hebrew Bible has gained momentum in recent years there is to date no investigation which concentrates exclusively on the animal metaphors in the book of Jeremiah In this book the author brings to light this neglected area of study by examining the language and imagery of the animal metaphors for the people of Israel in the book of Jeremiah The contribution that these metaphors make to the theology of the book is given special attention and since different interpretations have been given to many of the metaphors in question the author resolves some of the questions regarding the meaning of these images in his in depth study Additionally scholars have not tended to research metaphors for the nation of Israel and thus this volume draws attention to a particular subject which has largely been overlooked In chapter one Foreman familiarizes the reader with the major theoretical approaches to metaphor and spells out the approach taken in his investigation Eighteen metaphors are then thoroughly analyzed in chapters two three and four These metaphors are grouped into three categories each of which constitutes a chapter pastoral metaphors mammal metaphors and bird metaphors Chapter five draws the results of the inquiry together This study reveals how animal metaphors make important theological claims about the nation of Israel and demonstrates that they are essential elements of the message of the book of Jeremiah Foreman s elucidation of the language and imagery of the animal metaphors for the people of Israel leads to a richer understanding of these metaphors and ultimately contributes to a more precise interpretation of the message of the book of Jeremiah as a whole

Stephen Jackson, Peter Schouten, 2012-08-09 The world s gliding mammals are an extraordinary group of animals that have the ability to glide from tree to tree with seemingly effortless grace There are more than 60 species of gliding mammals including the flying squirrels from Asia Europe and North America the scaly tailed flying squirrels from central Africa and the gliding possums of Australia and New Guinea But the most spectacular of all are the colugos or so called flying lemurs that occur throughout South East Asia and the Philippines Animals that glide from tree to tree descend at an angle of less than 45 degrees to the horizontal while those that parachute descend at an angle greater than 45 degrees Gliding is achieved by deflecting air flowing past well developed gliding membranes or patagia which form an effective airfoil that allows the animal to travel the greatest possible horizontal distance with the least loss in height The flying squirrels and scaly tailed flying squirrels even have special cartilaginous spurs that extend either from the wrist or elbow respectively to help support the gliding membrane Gliding Mammals of the World provides for the first time a synthesis of all that is known about the biology of these intriguing mammals It includes a brief description of each species together with a distribution map and a beautiful full colour painting An introduction outlines the origins and biogeography of each group of gliding mammals and examines the incredible adaptations that allow them to launch themselves and glide from tree to tree **Themes in Old World**

Zooarchaeology Umberto Albarella, Cleia Detry, Sónia Gabriel, Catarina Ginja, Ana Elisabete Pires, 2021-04-28 This new collection of papers from leading experts provides an overview of cutting edge research in Old World zooarchaeology. The research presented here spans various areas across Europe, Western Asia and North Africa from the Mediterranean to the Atlantic. Several chapters focus on Iberia but the eastern Mediterranean and Britain are also featured. Thematically the book covers many of the research areas where zooarchaeology can provide a significant contribution. These include animal domestication, bone modifications, fishing, fowling, economic and social status as well as adaptation and improvement. The investigation of these topics is carried out using a diversity of approaches, thus making the book also a useful compendium of traditional as well as more recently developed methodological applications. All contributions aim to present zooarchaeology as a discipline that studies animals to understand people and their richly diversified past histories. This will be a valuable source of information not just for specialists but also for general archaeologists and potentially also historians, palaeontologists and geographers who have an interest for the research themes discussed in the book. The book is dedicated to Simon Davis who has been a genuine pioneer in the development of modern zooarchaeology. It presents hugely stimulating case studies from the core areas where Davis has worked in the course of his career. [T&T Clark Handbook of Food in the Hebrew Bible and Ancient Israel](#)

Janling Fu, Cynthia Shafer-Elliott, Carol Meyers, 2021-11-04 Food and feasting are key themes in the Hebrew Bible and the culture it represents. The contributors to this handbook draw on a multitude of disciplines to offer an overview of food in the Hebrew Bible and ancient Israel. Archaeological materials from biblical lands along with the recent interest in ethnographic data, a new focus in anthropology and emerging technologies provide valuable information about ancient foodways. The contributors examine not only the textual materials of the Hebrew Bible and related epigraphic works but also engage in a wider archaeological, environmental and historical understanding of ancient Israel as it pertains to food. Divided into five parts, this handbook examines and considers environmental and socio-economic issues such as climate and trade, the production of raw materials and the technology of harvesting and food processing. The cultural role of food and meals in festivals, holidays and biblical regulations is also discussed, as is the way food and drink are treated in biblical texts, in related epigraphic materials and in iconography.
