Proceedings present the contributions to the 13th International Kant Congress which was held at the University of Oslo August 6-9 2019. The congress which hosted speakers from more than thirty countries and five continents was dedicated to the topic of the court of reason. The idea that reason stands before itself as a tribunal characterizes the whole of Kant's critical project. Without such a court, reason falls into conflict with itself. With such a court in place, however, it may succeed in establishing the possibility and limits of metaphysics, ethics, aesthetics, law, and science. The idea of reason being its own judge is not only pivotal to a proper understanding of Kant's philosophy but can also shed light on the burgeoning fields of meta-philosophy and philosophical methodology. The 2019 Kant Congress put special emphasis on Kant's methodology, his account of conceptual critique, and the relevance of his ideas to current issues in especially political philosophy and the philosophy of law. Additional sections discussed a wide range of topics in Kant's philosophy. The Proceedings will provide anyone who is interested in exploring the variety of present-day work on Kant and Kantian themes with a wealth of fruitful inspiration.

**Intelligent Science and Intelligent Data Engineering** Yanning Zhang, Zhi-Hua Zhou, Changshui Zhang, Ying Li, 2012-07-23. This book constitutes the proceedings of the Sino foreign interchange Workshop on Intelligence Science and Intelligent Data Engineering IScIDE 2011 held in Xi'an, China, in October 2011. The 97 papers presented were carefully peer reviewed and selected from 389 submissions. The IScIDE papers in this volume are organized in topical sections on machine learning and computational intelligence, pattern recognition, computer vision and image processing, graphics and computer visualization, knowledge discovering, data mining, web mining, multimedia processing and application. *Deep Structure, Singularities, and Computer Vision* Ole Fogh Olsen, Luc Florack, Arjan Kuijper, 2005-12-04. This book constitutes the thoroughly refereed post-proceedings of the First International Workshop on Deep Structure Singularities and Computer Vision DSSCV 2005 held in Maastricht, The Netherlands, in June 2005. The 14 revised full papers and 8 revised poster papers presented were carefully reviewed and selected for inclusion in the book. They represent the current state of the art in understanding the relation between structural/topological information represented by singularities and metric information of signals, shapes, images, and colors. **Topics in Statistical and Theoretical Physics** R. L. Dobrushin, 1996. Motor Age, 1909. Philosophical Manuscripts David Lewis, 2023-09-28. David Lewis (1913-2001) was a celebrated and influential figure in analytic philosophy. When Lewis died, he left behind a large body of unpublished notes, manuscripts, and letters. This volume contains two longer manuscripts which Lewis had originally intended to turn into books and thirty-one shorter items. The longer manuscripts are *The Paradoxes of Time Travel* by David Gavin Young, *Lectures at the University of Adelaide and Confirmation Theory* which is based on a graduate course on probability and logic that he gave at UCLA. Lewis described his purposes in *The Paradoxes of Time Travel* as being 1) to solve a philosophical problem hitherto largely ignored or casually mis-solved by philosophers, 2) to introduce the layman to various topics in metaphysics since our problem turns out to connect with many more familiar ones, and 3) to show several of my favorite doctrines and methods in metaphysics. By contrast,

Confirmation Theory is a technical work in which Lewis aimed to present in a unified fashion what he considered to be the best from competing theories of confirmation Lewis described the work as Mathematically self contained with proofs for the major theorems but the mathematics is kept down to hairy high school algebra The thirty one shorter items cover such topics as causation freedom of the will probability counterparts reference logic value and divine evil They are included here both for their intrinsic philosophical interest and their historical value This volume also contains an intellectual biography of the young David Lewis by the editors

*Minimal Networks* The Steiner Problem and Its Generalizations Alexander O. Ivanov, Alexei A. Tuzhilin, 1994-03-16 This book focuses on the classic Steiner Problem and illustrates how results of the problem's development have generated the Theory of Minimal Networks that is systems of rubber branching threads of minimal length This theory demonstrates a brilliant interconnection among differential and computational geometry topology variational calculus and graph theory All necessary preliminary information is included and the book's simplified format and nearly 150 illustrations and tables will help readers develop a concrete understanding of the material All nontrivial statements are proved and plenty of exercises are included
